Introduction to the DRDP (2015)

Welcome to the Desired Results Developmental Profile (2015) [DRDP (2015)]: A Developmental Continuum from Early Infancy to Kindergarten Entry. The DRDP (2015) is a formative assessment instrument developed by the California Department of Education for young children and their families to be used to inform instruction and program development.

The DRDP (2015) is based on the previous DRDP instruments. It includes refinements made over the past several years and new elements that are essential to quality early childhood education. It aligns with the California Department of Education’s Early Learning and Development Foundation.

Key Features of the DRDP (2015):

- The DRDP (2015) is administered in natural settings through teacher observations, family observations, and examples of children’s work. Ongoing documentation of children's knowledge and skills in everyday environments is a recommended practice for early childhood assessment.
- The DRDP (2015) replaces the DRDP-Infant/Toddler (2010), the DRDP-Preschool (2010), and the DRDP access assessment instruments.
- The DRDP (2015) represents a full continuum of development from early infancy up to kindergarten entry. It has two views: the Infant/Toddler view for use with children in infant/toddler programs, and the Preschool View, for children in preschool programs.
- The DRDP (2015) is designed for use with all children from early infancy up to kindergarten entry, including children with Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs).
- The DRDP (2015) is aligned with all volumes of the California’s Infant/Toddler and Preschool Learning and Development Foundations, the Common Core Standards, and the Head Start Child Development and Early Learning Framework.
- The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California’s diverse population of young children, with specific consideration for children who are young dual language learners (see section below).
- The DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills. To enable access to the assessment for diverse populations, the principles of Universal Design were followed.
- The DRDP (2015) includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with Individualized Family Service Plans (IFSPs) or Individualized Education Programs (IEPs).

Information about Selected Key Features

Three of these key features: (1) consideration of young children who are dual language learners, (2) universal design and adaptations for children with IFSPs and IEPs, and (3) a detailed description of the developmental domains that make up the instrument, are described in more detail to help teachers and service providers better understand and rate the measures of the DRDP (2015).

Young Dual Language Learners and the DRDP (2015)

Dual language learners are children learning two or more languages at the same time, as well as those children learning a second language while continuing to develop their first (or home) language. A child’s experience with one or more languages is an asset to build on in the early childhood setting. It is critical to consider the child’s communication in all the languages that he or she is learning in order to have an accurate picture of a child’s knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages. There are also differences that must be taken into consideration when assessing young children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language. So it is important to assess children in all of the languages he or she understands and uses. The DRDP (2015) addresses cultural and linguistic responsiveness in two primary ways:

1. Teachers and service providers observe and document children’s behavior in both the home language and English to obtain a more accurate profile of the children’s knowledge and skills across developmental domains.

2. Teachers and service providers rate children’s progress on two language development domains. The Language and Literacy Development (LLD) domain assesses all children’s progress in developing foundational language and literacy skills where ratings should be based on skills in all languages. The English-Language Development (ELD) domain assesses current knowledge and skills and progress in learning to communicate in English.

Universal Design and the DRDP (2015)

In the context of assessment, “Universal Design” refers to the development of assessments that are appropriate for all children to the greatest extent possible. Universal Design allows children the opportunity to demonstrate their knowledge and skills in a variety of ways. All young children are entitled access to, and meaningful participation in, age-appropriate, individually-appropriate and culturally-appropriate early childhood curricula and assessments. Teachers and service providers support children’s access and participation by identifying and providing learning opportunities, materials, and teaching strategies in flexible and individualized ways and through a variety of learning modalities. DRDP (2015) assessors apply universal design when they carefully consider the various ways young children can demonstrate knowledge or skills that reflect mastery of a developmental level.
The Eight Domains of the DRDP (2015)

The DRDP (2015) is made up of eight domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs.

Approaches to Learning–Self-Regulation (ATL-REG)

The ATL-REG domain assesses two related areas that are recognized as important for young children's school readiness and success: Approaches to Learning and Self-Regulation. These areas have been combined into one domain because of the strong connections between them. The Approaches to Learning skills include attention maintenance, engagement and persistence, and curiosity and initiative. The Self-Regulation skills include self-comforting, self-control of feelings and behavior, imitation, and shared use of space and materials.

Social and Emotional Development (SED)

The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and interactions with peers, and symbolic and sociodramatic play.

Language and Literacy Development (LLD)

The LLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. LLD measures should be completed for all infants, toddlers, and preschool-age children, including those who are dual language learners.

English-Language Development (ELD)

The ELD domain assesses preschool-age dual language learners' progress in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home language, and the child's motivation to learn English. The ELD measures should be completed only for preschool-age children whose home language is other than English.

Cognition, Including Math and Science (COG)

The COG domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include spatial relationships, cause and effect, classification, number sense of quantity, number sense of math operations, measurement, patterning, shapes, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

Physical Development–Health (PD-HLTH)

The PD-HLTH domain assesses motor development and the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, fine motor manipulative skills, active physical play, nutrition, safety, and personal care routines (hygiene, feeding, dressing).

History-Social Science (HSS)

The HSS domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

Visual and Performing Arts (VPA)

The VPA domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

About the Measures of the DRDP (2015)

The levels for each DRDP (2015) measure describe a developmental continuum, ranging from earlier developing to later developing competencies. The DRDP (2015) includes three types of continua:

- **Full Continuum Measures**: describe development from early infancy up to kindergarten entry. These measures should be used with all infants, toddlers, and preschool-age children.
- **Earlier Development Measures**: describe development that typically occurs from early infancy through early preschool ages and may be used with preschool-age children under specific conditions (identified as Conditional measures).
- **Later Development Measures**: describe development that typically occurs from early preschool ages up to kindergarten entry. These measures should be used with all preschool-age children.
Conditional Measures for Preschool-Age Children

Some measures in the DRDP Preschool View are considered conditional measures that are assessed when certain conditions are met. These measures should be used if they assist teachers and service providers in planning a child’s learning activities and supports, and documenting progress.

*Guidance for rating ELD measures for children who are dual language learners is provided in the section, “Young Dual Language Learners and the DRDP (2015)” on page Intro-2.

The Developmental Levels

The number of levels in a measure varies depending on the competencies that are appropriate for that measure’s developmental continuum. The levels are organized under four categories from early infancy up to kindergarten entry: Responding, Exploring, Building, and Integrating:

**Responding (Earlier, Later)**
Knowledge, skills, or behaviors that develop from basic responses (through using senses and through actions) to differentiated responses. Children generally engage in back-and-forth interactions with familiar adults and communicate through nonverbal messages.

**Exploring (Earlier, Middle, Later)**
Knowledge, skills, or behaviors that include active exploration including purposeful movement, purposeful exploration and manipulation of objects, purposeful communication, and the beginnings of cooperation with adults and peers. Children generally begin this period by using nonverbal means to communicate and, over time, grow in their ability to communicate verbally or use other conventional forms of language.

**Building (Earlier, Middle, Later)**
Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others.

**Integrating (Earlier)**
Knowledge, skills, or behaviors that demonstrate the ability to connect and combine strategies in order to express complex thoughts and feelings, solve multi-step problems, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children begin to engage in mutually supportive relationships and interactions.

Note that the developmental levels for the ELD domain differ from the above format as they represent the developmental progression for the acquisition of English as a second language during the early childhood years.
Definitions of Terms in the Navigation Maps

**Developmental Domain:** A crucial area of learning and development for children.

**Measure:** The developmental continuum along which a child's observed behavior is assessed. Measures are the individual assessment items in the DRDP.

- **Full Continuum Measure:** Describes development from early infancy to early kindergarten.
- **Early Development Measure:** Describes development that typically occurs in infancy and toddler years.
- **Later Development Measure:** Describes development that typically occurs in the preschool years and early kindergarten.

**Definition:** Specifies the aspects of development to be observed.

**Developmental Level:** A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

**Descriptor:** Defines the behaviors that would be observed for a child at that developmental level.

**Example:** Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in the DRDP are not the only way a child can demonstrate mastery of a developmental level.

**Possible Examples:**
- Turns head and reaches for a toy. Walks and reaches for a toy. Use the full body to walk to a toy.
- Drops one thing in order to pick up another. Begins to lift self to reach for an object.
- Pulls toy a few feet, alternating hands, moves to varying distances, and pauses. Pulls toy with both hands.
- Holds self upright and begins to reach for objects. Sees objects in the periphery.
- Puts off play to interact with an adult. Sees toys in the periphery and reaches for them with adult assistance.
- Tense vocalization occurs as an infant first cries. Begins to reach for a person.
- Turns attention between an object being shown and a person.
- Emits a simple vocalization as an infant first cries.

**Examples:**
- Pulls up with support of adult or another child.
- Sits in a comfortable position and reaches for a toy by pulling up with support of adult.
- Turns head and reaches for a toy. Walks and reaches for a toy.
- Drops one thing in order to pick up another. Begins to lift self to reach for an object.

- Drops one thing in order to pick up another. Begins to lift self to reach for an object.
The 3 Steps to Completing the DRDP (2015)

**Step 1: Observation and Documentation**

The DRDP (2015) focuses on the child’s behavior, knowledge, and skills. To capture a child’s behavior, the DRDP (2015) incorporates observation in natural settings.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways, including spoken in the child’s home language, signed, and through other communication modes (e.g., via a communication device). The teacher’s and service provider’s direct observations of a child are the primary method used to inform ratings and they should also use other sources of evidence to capture a more complete picture of a child’s knowledge and skills. Other sources of evidence include the following:

- **Observations by others** – including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations
- **Other documentation** – including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior

**Observations should occur over time, in typical settings:**
- In the child’s typical program or settings such as child care, classrooms, or home;
- As the child interacts in familiar environments and routines with people he or she knows; and
- As the child engages in typical activities and routines.

The Important Role of Families in the Documentation Process

Family members have repeated opportunities to observe their child’s activities and interactions over time and in a variety of situations. Their perspectives, combined with teachers’ and service providers’ observations, provide a more complete and reliable picture of a child’s typical behaviors. Inviting family members to share observations of their child’s development and behavior is a recommended practice for the DRDP (2015). The opportunity to observe a child’s level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe a child interacting with family members. This is especially true for children who are new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.

**Observation and Documentation for Young Dual Language Learners**

Young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. They may also code-switch, which is using more than one language within a conversation. Therefore, communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains. The adult who is conducting observations and collecting documentation should speak the child’s home language. If not, the adult must receive assistance from another adult, who does speak the child’s home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

**Dual Language Learners’ Use of Code Switching**

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point.
- Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person.
- When children mix their two languages they use the grammatical rules of each language. For example, “I want leche” (“I want milk”) is an example of inserting a Spanish noun into a grammatically correct English sentence.

**Using Adaptations**

Adaptations are changes in the environment or differences in observed behavior that allow children with IFSPs or IEPs to demonstrate their knowledge and skills in typical environments. Seven broad categories of adaptations have been identified for children with IFSPs and IEPs for the DRDP (2015).

- The adaptations listed in the table below have been developed so that the assessment will more accurately measure a child’s abilities rather than the impact of a child’s disability (a more detailed description of the adaptations appears in Appendix D). Adaptations must be in place for the child during the normal course of the day, and they should also be in place during observations for the DRDP (2015). Everyone working with the child should be informed of any adaptations the child uses.
- New adaptations must not be introduced solely for the purpose of conducting the DRDP (2015) assessment.
- Consideration of adaptations should be made on a regular basis from early infancy and as the child develops and grows.
What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:
- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child’s mastery level may not appear on the list of examples, although they are consistent with the descriptor.

Seven Categories of Adaptations

Augmentative or Alternative Communication System
Methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others.

Alternative Mode for Written Language
Methods of reading or writing used by a child who cannot see well enough to read or write or cannot hold and manipulate a writing utensil (e.g., pencil, pen) well enough to produce written symbols.

Visual Support
Adjustments to the environment that provide additional information to a child who has limited or reduced visual input.

Assistive Equipment or Device
Tools that make it possible or easier for a child to perform a task.

Functional Positioning
Strategic positioning and postural support that allow a child to have increased control of his body.

Sensory Support
Increasing or decreasing sensory input to facilitate a child’s attention and interaction in the environment.

Alternative Response Mode
Recognition that a child might demonstrate mastery of a skill in a unique way that differs from the child’s typically developing peers.

Step 2: Rating the Measures

Determining the Child’s Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered, and mark it appropriately.

The Descriptors and Examples
Consider the descriptors first, and then the examples, to determine which developmental level is most consistent with your observations and other documentation of the child’s typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child demonstrates most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level. Most of the descriptors define discrete knowledge, skills, or behaviors. However, some include more than one behavior or skill, separated by “and,” “or,” or a semicolon (;) followed by “and.”

If the descriptor includes “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

- For example, the descriptor for Exploring Later in LLD 5: Interest in Literacy is:

  Looks at books on own briefly or Chooses to join reading, singing, or rhyming activities led by an adult

If the child EITHER looks at books on own briefly OR chooses to join reading, singing, or rhyming activities led by an adult, mastery can be rated at this level.
If a descriptor includes "and":
All parts of the descriptor are required for mastery and need to be observed together.
- For example, the descriptor for Building Earlier in ATL-REG 2: Self-Comforting is:
  Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways.

The child needs to demonstrate both anticipating a need for comfort and preparing self during the same observation.

If a descriptor includes a semi-colon (;) followed by "and":
The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a DRDP rating period.
- For example, the descriptor for Exploring Later in SED 3: Relationships and Social Interactions with Familiar Adults is:
  Initiates activities with familiar adults; and Seeks out assistance or support from familiar adults.

To be rated as mastered at this level, the child must BOTH initiate activities with familiar adults AND seek out assistance or support from familiar adults. The assessor does not have to observe both behaviors during the same observation within a DRDP rating period.

Please note that key terms and phrases in the descriptors that may be new or have specific meaning to the measures are defined in the Glossary at the end of the instrument.

Examples:
Keep in mind these important points about examples:
- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers and service providers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.
- Examples have not been written to include all areas of disability. Universal design is intended to support the inclusion of children with disabilities on the DRDP (2015). However, it is important to review the adaptations as well as understand the construct being measured when assessing children with disabilities.

Additional Rating Options

Emerging to the Next Developmental Level:
If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

To indicate emerging:
- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:
- You may mark emerging when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.
- Do not mark emerging if the child has mastered the latest level on a measure.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Child is Not Yet at the Earliest Developmental Level on a Later Development Measure:
If, after careful consideration, you determine that a preschool-age child is not yet demonstrating mastery of the earliest level of a later development measure, mark “Child is not yet at the earliest developmental level on this measure.”

Unable to Rate due to extended absence:
- This is used only when the child is absent from the program for such an extended period of time during the four to six weeks prior to submitting your DRDP data that you could not gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  - Not having enough time or enough information
  - The nature of a child's disability or the severity of a child's disability

The Responding Earlier level is designed to be inclusive of all children. Mark this earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.
### Rating Conditional Measures

If you are using the conditional measures, you will mark them on the DRDP according to the following guidance:

<table>
<thead>
<tr>
<th>Measure</th>
<th>How to Mark the DRDP</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ATL-REG 1: Attention Maintenance</td>
<td>- If the measure is rated, determine the child’s latest level of mastery and mark</td>
</tr>
<tr>
<td>ATL-REG 2: Self-Comforting</td>
<td>- If the measure is not rated, mark the box, “I did not rate this measure because</td>
</tr>
<tr>
<td>ATL-REG 3: Imitation</td>
<td>it is not used for documenting progress or planning this child’s learning activities</td>
</tr>
<tr>
<td>COD 1: Spatial Relationships</td>
<td>and supports”</td>
</tr>
<tr>
<td><strong>English-Language Development Measures</strong></td>
<td></td>
</tr>
<tr>
<td>ELD 1: Comprehension of English (Receptive English)</td>
<td>- If these measures are rated:</td>
</tr>
<tr>
<td>ELD 2: Self-Expression in English (Expressive English)</td>
<td>- Check the box on the Information Page about the child’s home language</td>
</tr>
<tr>
<td>ELD 3: Understanding and Response to English</td>
<td>- Determine the latest level of mastery for each measure and mark</td>
</tr>
<tr>
<td>Literacy Activities</td>
<td>- If these measures are not rated, leave them blank</td>
</tr>
<tr>
<td>ELD 4: Symbol, Letter, and Print Knowledge in</td>
<td></td>
</tr>
<tr>
<td>English</td>
<td></td>
</tr>
<tr>
<td><strong>Physical Development and Health Measures</strong></td>
<td></td>
</tr>
<tr>
<td>PD-HLTH 7: Personal Care Routines: Feeding</td>
<td>- If these measures are rated, determine the level of mastery and mark</td>
</tr>
<tr>
<td>PD-HLTH 8: Personal Care Routines: Dressing</td>
<td>- If these measures are not rated, check the box, “I did not rate this measure</td>
</tr>
<tr>
<td></td>
<td>because it is not used for documenting progress or planning this child’s learning</td>
</tr>
<tr>
<td></td>
<td>activities and supports”</td>
</tr>
<tr>
<td></td>
<td>- Complete all the other PD-HLTH measures for all children</td>
</tr>
</tbody>
</table>

#### Step 3: Finalize the Assessment

To finalize, simply review the assessment to make sure that you have entered a rating for all of the measures and that the Information Page is complete and up-to-date:

- For EESD programs: enter your ratings into DRDPtech,
- For SED programs: enter your ratings into your MIS system for your SELPA’s CASEMIS submission. Check with your administrator for when and to whom your Rating Records are due.
Child's Information

1. Child’s name:
   1a. Legal First Name: ____________________________
   1b. Legal Last Name: ____________________________

2. Agency Identifier or Statewide Student Identifier (10-digit SSID)
   __________________

3. Child’s classroom or setting: _______________________

4. Birth date (mm/dd/yyyy): _________________________

5. Gender:  
   □ male  
   □ female

6. Initial date of enrollment in early childhood program (mm/dd/yyyy):

Date child was withdrawn from the program: _______________________

7. Ethnicity:
   7a. What is this child’s ethnicity? Check one.
   □ Hispanic or Latino  
   □ Not Hispanic or Latino

   7b. What is this child’s race? Mark one or more races to indicate what this child considers himself/herself to be.
   □ Asian Indian  
   □ Black or African American  
   □ Cambodian  
   □ Chinese  
   □ Filipino  
   □ Guamanian  
   □ Hawaiian  
   □ Hmong  
   □ Japanese  
   □ Intentionally left blank
   □ Korean  
   □ Laotian  
   □ Native American  
   □ Other Asian  
   □ Other Pacific Islander  
   □ Samoan  
   □ Tahitian  
   □ Vietnamese  
   □ White

8. Does this child have an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP)?
   □ Yes  □ No  □ Don’t know

Assessor Information

9. Agency/site: ________________________________

10. Person(s) completing the assessment:
    Name/role: ___________________________________
    Name/role: ___________________________________
    Choose role from list below:
    • Primary Teacher
    • Special Education Teacher
    • Early Intervention Specialist
    • Home visitor
    • Other (please specify)__________________

11. Did another adult assist you with assessing this child?
    □ Yes (role/relation): ___________________________
    □ No

Child’s Language Information

12. Child’s home language(s)?
    Is a language other than English spoken in the child’s home?
    □ Yes  □ No

13. What language(s) do you speak with this child?

14. Did someone who understands and uses the child’s home language assist you with completing the observation?
    □ Yes (role/relation):
    □ No
    □ Not applicable - I understand and use the child’s home language.

15. Child is enrolled in: (Check all that apply)
    □ State Preschool  
    □ State Infant/Toddler Program  
    □ Head Start  
    □ First 5  
    □ Early Head Start  
    □ Title 1  
    □ State After-School Program  
    □ Family Child Care Home  
    □ Special Education Services  
    □ Migrant  
    □ Tribal Head Start  
    □ Other
1. Child's first name (Legal): ________________________________
2. Child's last name (Legal): ________________________________
3. Date DRDP (2015) was completed (e.g., 09/07/2015) _______ / _______ / _______
4. Assessment period (e.g., Fall 2015) ____________________________

**Child Information**

5. Student ID (Issued by district for reporting to CASEMIS) ________________________________
6. Statewide Student Identifier (10-digit SSID) ________________________________
7. Gender  □ Male  □ Female  8. Birth date (e.g., 03/05/2012) _______ / _______ / _______
9. Special education enrollment. Check one.  
   □ Individualized Family Service Plan (IFSP)  □ Individualized Education Program (IEP)

**Child's Language Information**

10. Child's home language(s):  
    □ English  □ Spanish  □ Vietnamese  □ Cantonese  □ Hmong  □ Tagalog/Pilipino  □ Other (specify) ________________________________
11. Language(s) used with this child:  
    □ English  □ Spanish  □ Vietnamese  □ Cantonese  □ Hmong  □ Tagalog/Pilipino  □ Other (specify) ________________________________
12. Is a language other than English spoken in the child's home?  □ Yes  □ No

**Child's Ethnicity**

13a. Is this child Hispanic or Latino? Check one.  
    □ Yes, Hispanic or Latino  □ No, not Hispanic or Latino  □ Intentionally left blank
13b. What is the race of this child? Check up to three.  
    □ Asian Indian  □ Hmong  □ Samoan  □ Black or African-American  □ Japanese  □ Tahitian  □ Cambodian  □ Korean  □ Vietnamese  □ Chinese  □ Laotian  □ White  □ Filippino  □ Native American  □ Intentionally left blank  □ Guamanian  □ Other Asian  □ Other  □ Hawaiian  □ Other Pacific Islander

**Special Education Information**

14. Special education eligibility. Check one.  
    □ Autism  □ Intellectual Disability  □ Specific Learning Disability  □ Deaf-Blindness  □ Hard of Hearing  □ Speech or Language Impairment  □ Deafness  □ Multiple Disability  □ Orthopedic Impairment  □ Deafness  □ Established Medical Disability  □ Other Health Impairment  □ Established Medical Disability  □ Visual Impairment

15. Adaptations used in the assessment. Check all that apply.  
    □ Augmentative or alternative communication system  □ Functional positioning  □ Alternative mode for written language  □ Sensory support  □ Alternative response mode  □ Visual support  □ Assistive equipment or device  □ None

**Program Information**

16. SELPA ________________________________
17. District of service ________________________________

**Assessment Information**

18. Name of person completing the assessment ________________________________
19. Role of person completing the assessment:  
    □ Early Intervention Specialist  □ Speech/Language Pathologist  □ Occupational/Physical Therapist  □ Teacher of the Deaf/Hard of Hearing  □ Program Specialist or Administrator  □ Teacher of the Visually Impaired  □ Special Education Teacher  □ Other
20. Assistance completing the assessment?  □ Yes  □ No
   If yes, what is that person's relationship to the child? ________________________________

Use this Information Page for a child with an Individualized Family Service Plan (IFSP) or Individualized Education Program (IEP) served by a California Department of Education program.
Quick Guide to Rating the Measures

1. Review your documentation/evidence.
   Review your own observation notes, observations from others (including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations), and other documentation, including samples of children's work, photographs, and video/audio recordings of children's communication and behavior.

2. Carefully read the definition and the descriptors, looking for mastery.
   Read the descriptors before you read the examples. As you read the descriptors, try to narrow down which one is most consistent with your observations and other documentation of the child's typical behavior. A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:
   - Consistently over time
   - In different situations or settings

3. After you read the descriptors, consider the examples.
   The examples represent only some of the possible ways a child might demonstrate mastery. They are not a checklist of what the child must demonstrate. It is possible that a child does not demonstrate any of the specific examples provided, but does demonstrate mastery in other ways that are consistent with the intent of the descriptor.

4. Based on your careful reading of the descriptors and examples and a review of your documentation, determine the child's level of mastery.
   Once you've determined the latest developmental level the child has mastered, mark it appropriately.

5. Indicate if the child is emerging to the next level (when the option to mark emerging is available).
   If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

**Important Note:** When reading the descriptors, be sure you understand and pay attention to semicolons and the words “or” and “and.” Most descriptors define a single skill or behavior, but some include more than one. If the descriptor includes:

- The word “or,” the child only needs to demonstrate the behavior in one of the ways listed for the developmental level to be considered mastered.
- The word “and,” all parts of the descriptor are required for mastery and need to be observed together.
- A semi-colon (:) followed by the word “and,” the child must demonstrate all the behaviors listed to master the level, but not necessarily during the same observation.

Remember, the examples illustrate only some of the many ways a child may demonstrate mastery.
### DRDP (2015) Rating Record

**A Developmental Continuum from Early Infancy to Kindergarten Entry**  
For use with preschool-age children

---

**Note:** The Rating Record is meant to be used together with the DRDP (2015) Instrument for keeping track of each child's developmental levels as you complete the assessment.

**Instructions:** Write the child's name, student identification number, and the date this Rating Record was completed. Mark the developmental level the child has mastered for each Measure. Check EM (emerging) if the child is "emerging" to the next level (optional). In the rare circumstance that you are unable to rate a Measure, mark UR. If you are not rating a child on a Conditional Measure, mark Conditional Measure.

## Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation

### ATL-REG 1: Attention Maintenance

Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>

<td></td>
<td></td>
<td>Middle</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Attends or responds briefly to people, things, or sounds**
  - Shifts attention frequently from one person or thing to another
  - Maintains attention, on own or with adult support, during brief activities
  - Maintains attention, with adult support, during activities that last for extended periods of time

- **Possible Examples**
  - Turns attention toward an interesting toy, then back to an adult or a child.
  - Actively shifts interest from one child to another playing close by.
  - Briefly watches other children playing and then resumes play with a toy.
  - Resumes playing at sand table when an adult joins in digging.
  - Dumps toy animals from container, puts animals back in the container, and then dumps them out again.
  - Listens to a book from beginning to end and then gestures for an adult to read it a second time.
  - Starts working on a simple puzzle with an adult and continues when the adult steps away briefly.
  - Continues playing with toy cars, adding a bridge offered by an adult sitting nearby.
  - Makes a pile of pretend pancakes with play dough on own and then offers them to peers.
  - Builds multiple towers with interlocking blocks.
  - Looks through several books on own in library corner during the morning.
  - Listens to audio books while looking at enlarged pictures related to the story on a screen, on own, during the morning.
**Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation**

**ATL-REG 2: Self-Comforting**

Child develops the capacity to comfort or soothe self in response to distress from internal or external stimulation.

### Possible Examples

**Mark the latest developmental level the child has mastered:**

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

**Conditional Measure**

I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports.

- **Responds to internal or external stimulation in basic ways**
  - Cries when hears a loud noise.
  - Closes eyes when taken into bright sunlight.
  - Brings fist to mouth and fusses when hungry.
  - Sucks thumb or fist to soothe self.
  - Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
  - Nuzzles face into a blanket or a familiar adult's shoulder when unfamiliar adults approach.

- **Engages in behaviors that have previously worked to soothe self**
  - Retrieves a familiar object, such as a blanket, to soothe self when upset.
  - Gestures “up” to a familiar adult to be picked up when sleepy.
  - Seeks contact with a familiar adult when a toy is taken by another child.

- **Comforts self by seeking a familiar adult or a special thing**
  - Softly hums or vocalizes to self when lying down for naptime.
  - Goes to cubby and gets a photo of family when upset after a parent leaves.
  - Seeks out a cozy place to get away from active play of other children.
  - Remains seated in a small group activity while manipulating a favorite toy.

- **Comforts self in different ways, based on the situation**
  - Asks what's going to happen next, to get ready to transition to a new activity.
  - Requests favorite book to read with parent before the parent leaves.
  - Moves away and covers ears when an adult brings out a vacuum to clean spilled sand on the floor.

- **Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways**
  - There are no later levels for this measure.
## ATL-REG 3: Imitation

Child mirrors, repeats, and practices the actions or words of others in increasingly complex ways.

**Possible Examples**

</tr>
</tbody>
</table>

- Puts a ring on and off of a ring stack a few times.
- Fills and dumps sand from a bucket.
- Shakes a bell while others are singing.
- Uses hands to smear finger paint.
- Activates a switch toy.
- Chooses to play in the dramatic play area for a short while and then plays in the block area.
- Selects a puzzle to work on with an adult, works on it together for a short time, and then wanders off, even with the adult’s encouragement to continue.
- Joins a small group and attends briefly to an adult reading a book, and then shifts attention to another activity.
- Strings large beads with an adult to make a necklace, briefly watches another child who brings magnets to the table, and then continues stringing beads.
- Stops playing with blocks and starts to move away from block area, but returns when an adult offers props, such as cars and street signs, to use with the blocks.
- Pauses to watch children running by while scooping sand, but returns to scooping when the adult offers another sand toy.
- Continues working on a difficult puzzle, asking an adult for help when needed.
- Continues looking at a book as an adult encourages other children entering the same area to find a book.
- Asks adult for headphones, while listening to a story on tape, when other children begin to play noisily nearby.
- Starts to get ready to go outside with other children, and asks for adult assistance with fasteners when putting on shoes.
- Continues to build a structure with interlocking blocks even when having difficulty finding the “right” pieces.
- Glues a variety of materials together to create a three-dimensional collage, trying different ways to make them stick.
- Repeatedly tries to trace around own hand.
- Completes an obstacle course using a walker, even on bumpy ground.
- Continues to work on spinning a round hoop around own waist over successive days.
- Continues at a pottery activity that involves shaping clay, letting it dry, painting it, and letting it dry some more.
- Writes own name, then writes it more clearly a second time at classroom sign-in table.
**Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation**

**ATL-REG 7: Shared Use of Space and Materials**
Child develops the capacity to share the use of space and materials with others

</table>

**Possible Examples**

- **Responding**
  - There are no earlier levels for this measure

- **Exploring**
  - Demonstrates preferences for a few specific toys or materials
  - Takes and plays with materials of interest, even when they are being used by another child
  - Shows awareness that other children might want to use materials, by taking action to control the materials
  - Maintains control of some preferred materials, allowing others to use the rest, but will need adult support to share preferred materials with other children
  - Follows expectations or procedures for sharing, most of the time, without adult prompting

- **Integrating**
  - Offers to share space or materials with others in the absence of explicit expectations for sharing

- **Possible Examples**
  - Chooses to play with doll with red hair on repeated occasions.
  - Chooses to play with the same toy dinosaur every day.
  - Selects the green marker every time when at the art table.
  - Takes another child’s toy, and seems surprised by the other child’s protest.
  - Picks up a purple marker after another child put it down momentarily to do something else.
  - Squeezes in between other children at the water table, making it difficult for the other children to continue their play.
  - Keeps all of the crayons nearby even if only using one or two colors.
  - Communicates, “Es mía,” [“It’s mine,” in Spanish], when another child reaches for a red cape.
  - Places favorite dolls behind back when other children are playing in the doll area.
  - Holds onto big brushes while painting at the table, but then gives other children some big brushes, with adult prompting.
  - Keeps favorite crayons nearby, and pushes the basket of other colored crayons to the center of the table.
  - Lets another child take a book from a pile nearby, but holds onto a few favorite books.
  - Communicates to another child, “That’s mine [referring to a carpet square]. Go get one from the pile over there,” while getting ready for story time.
  - Communicates, “It’s my turn when you are done,” to a child who is using the tricycle.
  - Puts name on waiting list when wanting to have a turn at the computer, after reminder by an adult that there is a waiting list.
  - Brings a carpet square to another child while getting ready for story time, without being asked.
  - Makes room for another child who wants to join in building a spaceship, and then offers a piece for the child to add.
  - Uses a communication device to ask another child to join in making a necklace.

</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Attends to a familiar adult during feeding.
  - Quiets when hears a familiar adult.
  - Grasps an adult’s finger when palm of child’s hand is touched.

- **Exploring**
  - Examines own hand or foot by looking at it or mouthing it.
  - Touches others’ hair when it is within reach.
  - Plays with sound by repeating grunts and squeals.

- **Building**
  - Acts out roles from own family in pretend play.
  - Communicates, using communication board, “His hair is red!”
  - Identifies own height, as indicated on a growth chart posted on the wall.
  - Narrates details while drawing a picture of a friend.
  - Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”

- **Integrating**
  - Communicates that a friend is happy because he is going to have a birthday party.
  - Says, “Ayokong hawakan ang susô. Na tatakot ako,” “[I don’t want to touch the snail. It scares me,” in Tagalog].
  - Communicates, “我喜欢游泳, 但是我姐姐不喜欢,” “[I love to swim, but my sister doesn’t,” in Chinese].

- **Possible Examples**
  - Communicates names of immediate family members in a photo.
  - Draws a picture of a house and communicates, “This is my house.”
  - Communicates to a peer that they both like peanut butter and jelly sandwiches.
  - Communicates, “I love to swim, but my sister doesn’t,” in Chinese.

- **Possible Examples**
  - Communicates names of familiar people (e.g., “dada,” “mama,” “grandma,” or sibling’s name).
  - Describes self or others based on physical characteristics.
  - Describes own preferences or feelings; and Describes the feelings or desires of family members, friends, or other familiar people.

- **Possible Examples**
  - Communicates own name and names of familiar people (e.g., “dada,” “mama,” “grandma,” or sibling’s name).
  - Expresses simple ideas about self and connection to others.

- **Possible Examples**
  - Communicates, “Me llamo Luis,” “[My name is Luis,” in Spanish].
  - Communicates that a friend is happy because he is going to have a birthday party.

- **Possible Examples**
  - Smiles when a familiar adult enters the room.
  - Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
  - Identifies own height, as indicated on a growth chart posted on the wall.
  - Narrates details while drawing a picture of a friend.

- **Possible Examples**
  - Selects a pink scarf for a friend whose favorite color is pink, then selects a blue scarf for self.
  - Communicates a peer that they both like peanut butter and jelly sandwiches.
  - Communicates, “我喜欢游泳, 但是我姐姐不喜欢,” “[I love to swim, but my sister doesn’t,” in Chinese].

- **Possible Examples**
  - Communicates, “I love to swim, but my sister doesn’t,” in Chinese.
  - Communicates, “I love to swim, but my sister doesn’t,” in Chinese.

- **Possible Examples**
  - Communicates, “Me llamo Luis,” “[My name is Luis,” in Spanish].
  - Communicates that a friend is happy because he is going to have a birthday party.

- **Possible Examples**
  - Communicates names of immediate family members in a photo.
  - Draws a picture of a house and communicates, “This is my house.”
  - Communicates to a peer that they both like peanut butter and jelly sandwiches.

- **Possible Examples**

<td><strong>Adjusts behavior in response to emotional expressions of familiar people, especially in novel or uncertain situations</strong></td>
<td><strong>Identifies own or others’ feelings</strong></td>
</tr>
</tbody>
</table>

**Possible Examples**

- Looks at faces.
- Turns head toward an adult during feeding.
- Grasps an adult’s finger when palm of child’s hand is touched.
- Smiles when an adult continues after pausing during a game of patty cake.
- Looks toward the location of where an adult’s face will reappear during a game of peek-a-boo.
- Kicks legs in excitement or adjusts body when a familiar adult leans forward to pick child up.
- Pays attention to a familiar adult’s facial expressions when an unfamiliar person enters the room.
- Stops playing, looks up, and then smiles when hearing a familiar adult’s laugh.
- Starts to climb on a table, but pauses in response to an adult’s cautionary look and warning.
- Moves or looks toward a familiar adult when a less familiar adult enters the room.
- Pauses after reaching toward a peer’s toy, to check on a less familiar adult’s response.
- Stops in response to a warning from another child’s parent about getting too close to the swing.
- Communicates, “También me gusta pintar, me hace feliz,” [“I like to paint, too; it makes me happy,” in Spanish] after noticing a child at an easel.
- Communicates that a crying child is sad.
- Communicates, “She wants the big truck.”
- Points to “angry” picture on emotion chart while looking at a peer.
- Responds that a friend is sad, when an adult asks, “Why did your friend get his blanket?”
- Communicates that the turtle was scared, when an adult asks, “Why did the turtle go into its shell?”
- Communicates, “Cô bé nhớ me của mình,” [“She misses her mommy,” in Vietnamese] when an adult asks, “What happened?”
- Communicates, “Magagalit siya kapag bumagsak na naman ang kanyang tulay,” [“He’ll be mad if his bridge is knocked down again,” in Tagalog].
- Uses a communication device to express, “I feel sleepy when it gets dark.”
- Communicates to a peer, “You’re silly,” when the peer starts giggling and other children join in.
- Communicates that a peer is shy when seeing her hide as an unfamiliar adult approaches.
- Communicates that another child plays with everyone because he is so friendly.

**Child is emerging to the next developmental level**

**Unable to rate this measure due to extended absence**

</table>

- Cries in response to a loud voice.
- Looks toward a lamp when it is turned on.
- Moves arm in response to a touch.
- Reaches toward an adult's glasses.
- Grabs a toy, shakes it, and then shakes it again.
- Picks up a toy and mouths it.
- Gazes intently at an adult's changing facial expressions.
- Rocks a doll in arms.
- Uses a brush on a doll's hair.
- Pushes a toy car along the floor.
- Places objects from around the room in a toy shopping cart.
- Uses a stacking ring as a bagel.
- Holds a rectangular block to ear and talks into it as if it is a phone.
- Pretends that puzzle pieces are cookies.
- Pretends to be a doctor and takes care of a stuffed bear that is "sick."
- Makes a pretend cake in the sandbox and offers a "taste" to an adult.
- Makes a "pizza" out of play dough and puts it in the play oven.
- Sits in a box, pretending it is a boat.
- Sits in a box with a peer, holding a "steering wheel," and communicates, "My turn to drive the bus."
- Pours "coffee" for friends while seated together at a table in the dramatic play area.
- Pretends to put out fires on the playground with others, using pretend hoses and wearing firefighter hats.
- Agrees with peers on who will be the bus driver, who will be the child, and who will be the mommy, while acting out school-bus play.
- Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
- Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.

- Cries in response to a loud voice.
- Looks toward a lamp when it is turned on.
- Moves arm in response to a touch.
- Reaches toward an adult's glasses.
- Grabs a toy, shakes it, and then shakes it again.

- Holds a rectangular block to ear and talks into it as if it is a phone.
- Pretends that puzzle pieces are cookies.
- Pretends to be a doctor and takes care of a stuffed bear that is "sick."
- Makes a pretend cake in the sandbox and offers a "taste" to an adult.
- Makes a "pizza" out of play dough and puts it in the play oven.
- Sits in a box, pretending it is a boat.
- Sits in a box with a peer, holding a "steering wheel," and communicates, "My turn to drive the bus."
- Pours "coffee" for friends while seated together at a table in the dramatic play area.
- Pretends to put out fires on the playground with others, using pretend hoses and wearing firefighter hats.
- Agrees with peers on who will be the bus driver, who will be the child, and who will be the mommy, while acting out school-bus play.
- Plans with peers to pretend to be a family going on a trip: using chairs as seats for a car, negotiating roles, and deciding where they will go.
- Assigns roles and acts out classroom routines (e.g., circle time, snack time) with other children.

- Cries in response to a loud voice.
- Looks toward a lamp when it is turned on.
- Moves arm in response to a touch.
- Reaches toward an adult's glasses.
- Grabs a toy, shakes it, and then shakes it again.
- Picks up a toy and mouths it.
- Gazes intently at an adult's changing facial expressions.
- Rocks a doll in arms.
- Uses a brush on a doll's hair.
- Pushes a toy car along the floor.
- Places objects from around the room in a toy shopping cart.
- Uses a stacking ring as a bagel.
- Holds a rectangular block to ear and talks into it as if it is a phone.
- Pretends that puzzle pieces are cookies.
- Pretends to be a doctor and takes care of a stuffed bear that is "sick."
- Makes a pretend cake in the sandbox and offers a "taste" to an adult.
- Makes a "pizza" out of play dough and puts it in the play oven.
- Sits in a box, pretending it is a boat.
- Sits in a box with a peer, holding a "steering wheel," and communicates, "My turn to drive the bus."

### Possible Examples

- **Responds to voices, sounds, gestures, or facial expressions in basic ways**
  - Turns head or looks in direction of voices.
  - Sustains gaze at an adult’s smiling face.
  - Quiets or orients in the direction of a sound or gesture.
  - Cries when child hears another child cry.

- **Responds to voices, gestures, or facial expressions in a variety of ways (e.g., eye gaze, gaze aversion, vocalization, movements)**
  - Smiles in response to a familiar adult’s voice or gestures.
  - Vocalizes in response to a familiar adult’s voice.
  - Moves toward a familiar adult’s extended arms.
  - Turns head and looks away after a familiar adult offers a bottle or food again.

- **Responds to a few frequently used words or gestures in familiar situations**
  - Reaches for a familiar object after it is named.
  - Looks up at sky after an adult communicates, “There’s an airplane.”
  - Moves toward the sandbox after an adult says, “I see new toys in the sandbox.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult says, “Your friend wants to play, too.”
  - Communicates, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Responds to simple comments that relate to a present situation**
  - Moves toward a familiar adult’s extended arms.
  - Communicates, “Okay,” after an adult asks, “Your friend wants to play, too.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Responds to one-step requests or questions that involve a familiar activity or routine**
  - Moves toward a familiar adult’s extended arms.
  - Communicates, “Okay,” after an adult asks, “Your friend wants to play, too.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Carries out one-step request that relates to a new or unfamiliar activity or situation**
  - Moves toward a familiar adult’s extended arms.
  - Communicates, “Okay,” after an adult asks, “Your friend wants to play, too.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Carries out multi-step requests that involve a familiar activity or situation**
  - Moves toward a familiar adult’s extended arms.
  - Communicates, “Okay,” after an adult asks, “Your friend wants to play, too.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Carries out multi-step requests that involve a new or unfamiliar activity or situation**
  - Moves toward a familiar adult’s extended arms.
  - Communicates, “Okay,” after an adult asks, “Your friend wants to play, too.”
  - Calms when adult communicates, “Your turn is next.”
  - Picks up sand toys after an adult says, “Please pick up the sand toys.”
  - Brings a watering can to the garden after a peer asks, “Want to water?”
  - Signs, “Okay,” after an adult asks, “Who is the helper for snack?”

- **Follows simple direction to tag another child when learning a new game.**
- **Follows simple direction to tag another child when learning a new game.**
- **Follows steps communicated by an adult at the end of an art activity to remove smock, hang it up, and then wash hands.**
- **Follows adult’s request to “push your chair in, put your book in the cubby, and wash your hands.”**
- **Chooses a book and then carries it to the library counter after an adult says, “Find a book and take it to the library counter.”**
- **Gathers different materials from outside, brings them inside, and places them on a table, as suggested by an adult, to create a nature display.**
- **Cares for a new pet for the first time by providing clean water, food, and fresh shavings for a guinea pig, after being told the steps by a peer.**

<td>Later</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Makes sounds spontaneously**
- **Responding**
  - Uses sounds, gestures, or facial expressions to communicate
  - Smiles when a familiar person approaches.
  - Cries or looks at an adult when hungry.
  - Vocalizes or babbles while interacting with an adult.

- **Early**
  - Asks for food when hungry, by using a special word, sound, or gesture for food.
  - Communicates, "Mama," "Dada," "Baba," or similar word approximations.
  - Reaches for or gestures for an object.
  - Names familiar foods, toys, or family members.
  - Communicates ideas such as "No," "More," or "Up."
  - Indicates a picture of a ball when asked what the child wants to play with next.

- **Middle**
  - Communicates, "Mommy come," when wanting a parent.
  - Communicates, "More juice," when thirsty.
  - Communicates, "我的卡車!" ["My truck!"] in Chinese after another child takes a toy truck.

- **Late**
  - Communicates, "A mi me toca," ["It's my turn," in Spanish] when an adult brings the pet rabbit for a visit.
  - Communicates, "I want mommy."
  - Communicates, "I like dogs," while looking at an animal book.

- **Integrating**
  - Communicates, "The rabbit is scared," when the pet rabbit snuggles into an adult’s lap. ("Scared" is an adjective.)
  - Communicates using a communication board, "I need a tissue. My nose is runny." ("Tissue" is a noun and "runny" is an adjective.)
  - Communicates, "Malaking malaki ang aso namin," ["Our dog is huge," in Tagalog] after hearing the pet rabbit snuggles into an adult’s lap.

#### Cannot rate this measure due to extended absence

- **Middle**
  - Communicates in sign language that the cat’s feet are wet. ("Feet" is a possessive pronoun; "feet" is plural.)
  - Communicates, "He ran really fast," (He ran really fast). ("Runned" is past tense with a grammatical error.)

- **Late**
  - Communicates to a peer, during play, "Yesterday we made vegetable soup." ("We is a pronoun; made is past tense.)
  - Communicates, "His birthday is tomorrow. He will be five." ("His" is a possessive pronoun; "he" is a pronoun; "will be" is future tense.)
  - Communicates in sign language that the cat’s feet are wet. ("Feet" is a possessive pronoun; "feet" is plural.)

- **Early**
  - Communicates to a peer, "Let’s hurry and clean up so we can go outside to ride bikes."
  - Communicates via spoken words, signs, or a communication device, "The dog ate the cat’s food, and then he got in trouble. We put him outside and he was very sad."
  - Communicates, "Dragons don’t need bikes ’cause they can fly. They have really big wings."

**LLD 4: Reciprocal Communication and Conversation**

Child engages in back-and-forth communication that develops into increasingly extended conversations.

**Possible Examples**

- **Responding**
  - Responds to sounds or movements of others in basic ways
  - Responds to or seeks contact with familiar adults, using vocalizations, gestures, or facial expressions during interactions
  - Possible Examples:
    - Looks at the direction of voices or movement.
    - Quiets in response to sound.
    - Turns toward the soft touch of an adult.
    - Looks at a familiar adult during feeding.

- **Exploring**
  - Engages in brief back-and-forth communication with a familiar adult, using word approximations, vocalizations, gestures, or facial expressions
  - Possible Examples:
    - Expresses, “Ba,” in response to an adult talking about a ball, and then waits for the adult to respond.
    - Rubs eyes and responds, “Night-night,” after a familiar adult asks, “Are you tired?”
    - Brings a ball to an adult, and then responds, “Ball,” after the adult asks, “Do you want to play ball with you?”

- **Building**
  - Engages in brief back-and-forth communication, combining words to communicate meaning
  - Possible Examples:
    - Communicates, “Yes,” or “No,” after an adult asks, “Do you want more milk?”
    - Communicates, “That’s my baby,” in Chinese, after a peer communicates, “I’m the mommy,” while playing house.
    - Communicates with a peer while looking at a caterpillar together. Comments, “That’s really hairy.” When peer responds, “Yeah, really hairy.”

- **Integrating**
  - Engages in conversations with a shared focus, contributing clarifying comments or building on the other person’s ideas
  - Possible Examples:
    - Communicates, “That’s my family,” while looking at a photo with a peer. When the peer says, “You have two sisters,” responds, “I have a big sister, and that’s my baby sister.”
    - A brief conversation with a peer while looking at a caterpillar together. Comments, “That’s really hairy.” When peer responds, “Yeah, really hairy.”

**Conversations can include communication using sign language or alternative communication systems.**

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

<td>Attends briefly to a familiar adult reading books, singing songs, or saying rhymes</td>
<td>Looks at books on own briefly, or Chooses to join reading, singing, or rhyming activities led by an adult</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Quiets to the sound of a familiar voice.
- Moves in response to an approach by a familiar adult.
- Orient to an adult’s face or voice during a caregiving routine.

• Interacts with a cloth or board book by holding or mouthing it.
• Pats a textured board book.
• Vocalizes or laughs in response to an adult singing and gesturing a simple finger-play song, such as, “Pat-a-Cake” or “Los cinco deditos,” ([“Five Little Fingers,” a finger play in Spanish].)
• Looks at pictures in a book for a short time while a familiar adult reads the book.
• Reaches to turn the page of a board book as a familiar adult talks or signs about the pictures on the page.
• Joins a group doing a simple finger play led by an adult.
• Points at a picture when joining an adult who is reading a book, newspaper, or tablet.
• Picks up a book and looks at pictures, turns a few pages, and then drops the book to go play.
• Pretends to read a book from start to finish.
• Explores a book with Braille and tactile content with hands.
• Sings some words of a familiar song, from beginning to end, with an adult.
• Asks questions or communicates about why something happened in a story.
• Starts a song or rhyme with others while playing outside.
• Uses finger puppets while reciting a familiar rhyme.
• Chooses to read a book related to a particular theme or interest (e.g., dinosaurs or fairies).
• Asks for help finding a book about bugs after a nature walk.
• Participates, with others, in using the computer to create a story about a class trip.
• Makes up own version of rhyming song with peers’ names.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
**LLD 6: Comprehension of Age-Appropriate Text**

Child develops capacity to understand details and ideas from age-appropriate text presented by adults

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

**Possible Examples**

- **There are no earlier levels for this measure**
- **Shows interest when attending to books, pictures, or print materials, with an adult**
  - Looks at a picture book with an adult.
  - Brings a favorite book about baby animals to an adult, to be reread often.
  - Points to photos, with captions, that were taken while on a nature walk.
  - Turn the page after an adult stops reading a book.
  - Touches Braille and image of sheep with textured wool in a book and says, “Sheep.”
- **Provides simple one- or two-word responses to questions when attending to books or other materials that include text, with an adult**
  - Communicates, “Paste,” after an adult points out items on a children’s menu.
- **Makes comments or asks questions about text presented in books or the environment**
  - Communicates, “Elephants have really big ears,” after an adult reads about elephants.
  - Asks, “Why did they go there?” during the reading of a story.
  - Points to a lighted exit sign and asks, “What does that say?”
- **Demonstrates knowledge of main characters, events, or ideas in familiar narrative or informational text**
  - Reenacts a story about firefighters with peers, using props for hoses, boots, and hats.
  - Pretends to direct traffic on the bike path after listening to a book about what community helpers do.
  - Uses a shawl to carry a doll after a read-aloud of the storybook *What Can You Do with a Rebozo?* ("Shawl" in Spanish).
  - Communicates that the caterpillar will have a stomachache, after rereading *The Very Hungry Caterpillar*.
  - Communicates, "Monkeys took his hat," after an adult reads about elephants.
  - Comments, “The man got mad because the monkeys took his hat,” during a read-aloud of the story *Caps for Sale*.
- **Demonstrates knowledge and understanding of details in narrative or informational text that includes order of events or cause and effect**
  - Predicts that the firefighters will come quickly to put out the fire, after an adult pauses while reading a book about firefighters to ask, “What will happen next?”
  - Draws a caterpillar, a cocoon, and a butterfly after an adult reads a story about the life of a butterfly.
  - Pretends to be Max, refuses to eat dinner, and then pretends to turn into a monster and become the king of the monsters, after hearing the book *Where the Wild Things Are*.
  - Comments, “The man got mad because the monkeys took his hat,” during a read-aloud of the story *Caps for Sale*.
  - Communicates, using a communication board, “Firefighters have to wear special clothes so that they don’t get burned,” after an adult reads a book about what firefighters do.
  - Holds up two books about bears and communicates, “Ang dalawang aklat na ito ay tungkol sa mga uso, ngunit ang mga uso sa Goldilocks ay mas maganda,” (“These two books are about bears, but the bears in *Goldilocks* are nicer,” in Tagalog).**
  - Relates what happens in a familiar storybook to a peer as they begin to share the book together.
  - Brings a book from home and communicates to the class about what happens in the story and why.

**Notes**

- ![ ] Child is not yet at the earliest developmental level on this measure
- ![ ] Child is emerging to the next developmental level
- ![ ] Unable to rate this measure due to extended absence

### LLD 8: Phonological Awareness

Child shows increasing awareness of the sounds (elements) that make up language, including the ability to manipulate them in language.

#### Mark the latest developmental level the child has mastered:

<table>

</tr>
</tbody>
</table>

- **Possible Examples**

  - **Responding**
    - Turns toward adult when adult sings a song.
    - Looks at adult’s hands when adult signs “more.”
    - Attends to adult saying, “bye-bye.”
    - Whispers a word, and then says it loudly.
    - Communicates, “No, no, no, no,” varying pitch.
    - Uses sounds or hand movements to play with variations of stress and rhythm.
    - Rhymes children’s names with other words during a group sing-along.
    - Sings “Twinkle, Twinkle, Little Star” with a group.
    - Communicates the rhyming word “fall,” after an adult says, “Humpty Dumpty sat on a wall.”
    - Uses signs to participate in a song such as “The Wheels on the Bus.”
    - Moves arms each time the word “row” is said in the song “Row, Row, Row Your Boat,” with adult and peers.
    - Segments larger units of language (e.g., compound words and syllables) with or without the support of pictures or objects;
    - Blends larger units of language (e.g., compound words and syllables) with or without the support of pictures or objects;
    - Blends smaller units of language (e.g., onsets and rimes), with or without the support of pictures or objects;

- **Exploring**

  - Demonstrates awareness of variations in sounds

  - **Possible Examples**

    - “I am Matt” in a name game
    - “Humpty Dumpty had a great . . . ?”
    - Drumming while saying “I have a fish” and “a fish” after an adult communicates, “What happens when I put fish in the water?”
    - “Goldfish” after an adult asks, “If you put together the words ‘gold’ and ‘fish,’ what word does that make?”
    - “Cup” at the snack table, after an adult says, “I have a c–up. What do I have?”
    - “Lee,” after an adult asks what word is left when the m– is removed from the word “mice,” while playing a word game.
    - “d” (letter sound), while looking at a picture of a dog, after an adult says, “What is the first sound you hear when you say ‘dog’?”
    - “Zebra” after an adult separates the word into syllables, and says, “Ze–, and “–bra,” while looking at a wordless picture book about the zoo.
    - “Marker,” after an adult communicates, “What happens when I put the two syllables ‘mark’– and ‘–er’ together?”

- **Building**

  - **Possible Examples**

    - “There are two words in the word ‘cat.’”
    - “What do I have?”
    - “Goldfish” after an adult asks, “If you put together the words ‘gold’ and ‘fish,’ what word does that make?”
    - “Cup” at the snack table, after an adult says, “I have a c–up. What do I have?”
    - “Lee,” after an adult asks what word is left when the m– is removed from the word “mice,” while playing a word game.
    - “d” (letter sound), while looking at a picture of a dog, after an adult says, “What is the first sound you hear when you say ‘dog’?”

#### Notes:

- Children who are deaf and learning American Sign Language will attend to elements of language (hand shapes and movements) in the early levels of learning, but eventually will be able to use finger spelling in relation to learning about sounds. For a child who is hard of hearing, has a cochlear implant, or is using cued speech, the sequence may or may not be similar to that of a hearing child.

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

</tbody>
</table>

There are no earlier levels for this measure

Demonstrates awareness that pictures represent people or things

Demonstrates awareness of a few common simple symbols in the environment

Demonstrates awareness of a few letters in the environment

Identifies some letters by name

Identifies ten or more letters (not necessarily at the same time); and Shows understanding that letters make up words

Identifies most upper-case letters; and Identifies most lower-case letters; and Shows understanding that a letter corresponds to a sound in words

Possible Examples

- Points to a picture of a bird in a book when adult communicates, “Bird.”
- Goes and gets teddy bear after seeing a picture of a bear.
- Sees a photo of mother and communicates, “Mama.”
- Recognizes that a stop sign means “stop.”
- Places paper in a recycling bin after noticing the recycling symbol (three arrows forming a circle) on the bin.
- Notices a familiar store or business in the neighborhood from its logo.
- Asks an adult what signs in Braille say.
- Holds up hand or communicates, “Me,” when an adult holds up a sign with child’s name.
- Finds the first letter of own name in the environment, such as on labels, artwork, cubbies, or chairs.
- Communicates, “I found the same letter,” when playing a letter matching game in print or Braille.
- Names some letters while looking at an alphabet book.
- Points and names some letters in an alphabet puzzle.
- Communicates, “I have two As in my name, one big A and one little a,” in Spanish when reading own name, Anna, on cubby.
- Names at least ten letters while placing them on a magnet board.
- Copies the word “cat” and communicates that it says “cat” (letters may not be written accurately).
- Says, “Fish,” after reading the word in Braille.
- Communicates, “Hay dos letras A en mi nombre, una A grande y una a pequena,” [“I have two As in my name, one big A and one little a,” in Spanish] when reading own name, Anna, on cubby.
- Names, by sight or touch, most of the letters of the alphabet, when reading an alphabet book.
- Communicates, “Ball starts with B,” after hearing the word “ball” in a story.
- Looks at the word “mat” in large print and says “m” (letter sound).
Developmental Domain: LLD — Language and Literacy Development

**LLD 10: Emergent Writing**
Child shows increasing ability to write using scribbles, marks, drawings, letters, characters, or words to represent meaning*

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Later</td>
</tr>
<tr>
<td>Middle</td>
<td>Middle</td>
<td>Middle</td>
<td>Middle</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Makes marks on paper
  - Makes scribble marks
  - Makes scribble marks or simple drawings that represent people, things, or events
  - Makes marks to represent own name or words
  - Uses letters or clearly recognizable approximations of letters to write own name
  - Writes several words or a few simple phrases, or clearly recognizable approximations

- **Exploring**
  - Dips sponge in paint and dots onto paper.
  - Makes a dot on a paper and then makes more dots using different markers.
  - Holds crayon against paper.
  - Uses crayons, pencils, or markers to make back-and-forth marks.
  - Paints using large or small movements.
  - Scribbles by moving finger on screen of tablet or by using Braille writer.
  - Draws circles and lines and comments, “Baby,” and “Mommy.”
  - Makes marks on paper and then explains that it is a birthday cake.
  - Draws a series of lines to represent a house and a tree.
  - Makes marks to represent the dog from a story by moving finger on screen of tablet or touch screen of computer.
  - Makes marks that are linear and spaced like letters or words while writing a pretend grocery list.
  - Makes marks for a restaurant order in the dramatic play area.
  - Uses an adaptive device to hold a marker to make marks on paper to represent the word “mom.”
  - Writes own name on drawings made in class.
  - Signs a self-made card to grandma with a close approximation of own name.
  - Uses a few letter stamps to represent own name.
  - Writes, “dog” (“dog”), copying the word from a book, to label a drawing of a dog.
  - Writes “STOP” on a stop sign in a drawing.
  - Writes “I love you” on a drawing made for a family member.
  - Uses a Braille writer to practice writing a few simple words.

- **Building**
  - Child is emerging to the next developmental level
  - Unable to rate this measure due to extended absence

* Children who are familiar with print in languages other than English may demonstrate differences in how they approach writing. For instance, some languages use letters (e.g., English, Spanish, Tagalog, Arabic, Hebrew), while others use characters (e.g., Chinese).
ELD 1: Comprehension of English (Receptive English)

Child shows increasing progress toward fluency in understanding English

Developmental Domain: ELD — English-Language Development

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Discovering Language</th>
<th>Discovering English</th>
<th>Exploring English</th>
<th>Developing English</th>
<th>Building English</th>
<th>Integrating English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recognizes a few frequently used words or gestures in the home language and culture in familiar situations</td>
<td>Shows understanding of words and phrases in conversations, stories, and interactions in home language (may show little understanding of common words and phrases in English)</td>
<td>Attends to interactions in English and sometimes participates in activities conducted in English; and shows understanding of a few common English words in familiar contexts or routines</td>
<td>Shows understanding of some common words and phrases in English during interactions and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of many words, phrases, and concepts in English during interactions and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of most information and concepts communicated in English for both instructional and social purposes</td>
</tr>
</tbody>
</table>

Possible Examples

- Waves good-bye after an adult communicates, “Good-bye,” in the child’s home language and culture.
- Indicates interest in continuing an activity after an adult pauses and asks to continue in the child’s home language and culture.
- Orient toward a familiar person or thing when it is named in the home language.
- Adds a block to the top of a tower in response to a question in the child’s home language, “Can you make it taller?”
- Passes a book to another child when requested in the child’s home language, having not responded to the same request in English.
- Seeks out and plays with peers who speak the child’s home language, while in the dramatic play area.
- Pauses to listen to peers speaking English for a short period of time while playing in the sandbox.
- Nods head when an adult at the snack table asks in English, “Do you want more apples?” while holding up a plate of apple slices.
- Begins to put blocks on a shelf when a peer says in English, “Clean-up time.”
- Points to the ball when a peer says in English, “Where is the ball?” during outdoor play time.
- Goes to get markers after an adult asks in English if child would like to use paint or markers to make a birthday card for a peer.
- Approaches the door to go inside when an adult says in English, “It is time to go in for a snack,” and adds, “Hora de comer!” (“Time to eat!” in Spanish).
- Adds more blocks to a road when a peer communicates in English, “We need a longer road.”
- Pretends to talk on the phone when a peer says in English, “Baby’s sick. Call the doctor.”
- Puts drawing on the counter after an adult asks in English, “Please put your drawing on the counter. It’s wet and it needs to dry.”
- Sorts orange and green squash after an adult says in English, “Let’s separate them by color.”
- Brings a bigger block to a peer in response to a question in English by the peer, “Could you bring me the bigger block?”
- Nods head excitedly when a peer asks in English if child wants to ride bikes together outside.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

Comprehension of English (Receptive English)
**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Discovering Language</th>
<th>Discovering English</th>
<th>Exploring English</th>
<th>Developing English</th>
<th>Building English</th>
<th>Integrating English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Uses a few “first words” or word-like sounds or gestures to communicate in home language</td>
<td>Communicates in home language or nonverbally, or both</td>
<td>Communicates most competently in home language, occasionally using single words or short memorized sequences of words in English</td>
<td>Communicates in English, using single words and common phrases (may mix English with home language)</td>
<td>Communicates in English, using sentences that may be incomplete (may contain grammatical errors and may mix English with home language)</td>
<td>Communicates in English, often using complete sentences, about a variety of social and instructional concepts and topics (may contain grammatical errors and may mix English with home language)</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Uses a few “first words” or word-like sounds or gestures to communicate in home language**
  - Takes an adult’s arm and leads the adult to the drawing area, where several children are drawing, and reaches or gestures toward the paper container.
  - Nods, “Yes,” and responds in home language in response to a routine question such as, “Do you want more milk?” while an adult holds up a pitcher of milk.
  - Communicates, “¿Puedo pintar contigo?” [“Can I paint with you?” in Spanish] while approaching a peer who is painting.
  - Communicates, “这是它们的家。” [“This is their home,” in Chinese] while putting some toy animals under a blanket in the dramatic play area.

- **Communicates in home language or nonverbally, or both**
  - Communicates in English, “Bye,” to a peer when leaving at the end of the day.
  - Greets peers in home language and joins in singing the words “good morning” in English during the daily morning song.
  - Chimes in with, “The end!” in English when an adult finishes reading a story to a small group of children.

- **Communicates most competently in home language, occasionally using single words or short memorized sequences of words in English**
  - Communicates in English, “Marker,” to ask for a marker from a peer while playing restaurant in the dramatic play area.
  - Communicates in English, “I do a house,” [“I made a house.”] while painting.
  - Communicates to a peer in English, “My turn,” and gestures at the slide during outdoor play.
  - Communicates, “The dog 变成一个lady了.” [“The dog turned into a lady,” in English and Chinese] while helping to put a dress on a stuffed dog in the dramatic play area.

- **Communicates in English, using single words and common phrases (may mix English with home language)**
  - Communicates to a peer while playing with play dough, “I make galletitas [“cookies” in Spanish] and pan [“bread” in Spanish]. You like it?” [“I made cookies and bread. Do you like it?”]
  - Communicates to a peer in English, “Come! I show you!” [“Come! I will show you!”] and brings the peer to child’s cubby, where child takes a stuffed animal out of a bag.
  - Communicates to a peer, “My dad lick my hand!” [“The lamb licked my hand!”] when describing a family trip to a petting farm that occurred last weekend.
  - Communicates to a peer, “My dad ride a ngựa,” [“My dad rides a” in English; “horse” in Vietnamese] while attempting to draw a horse.

- **Communicates in English, using sentences that may be incomplete (may contain grammatical errors and may mix English with home language)**
  - Communicates to a peer while playing with play dough, “I make galletitas [“cookies” in Spanish] and pan [“bread” in Spanish]. You like it?” [“I made cookies and bread. Do you like it?”]
  - Communicates to a peer in English, “Come! I show you!” [“Come! I will show you!”] and brings the peer to child’s cubby, where child takes a stuffed animal out of a bag.
  - Communicates to a peer, “My dad lick my hand!” [“The lamb licked my hand!”] when describing a family trip to a petting farm that occurred last weekend.
  - Communicates to a peer, “My dad ride a ngựa,” [“My dad rides a” in English; “horse” in Vietnamese] while attempting to draw a horse.

- **Communicates in English, often using complete sentences, about a variety of social and instructional concepts and topics (may contain grammatical errors and may mix English with home language)**
  - Communicates in English, “This is happy new year. This is mommy and me. We saw the dragon,” in response to an adult asking, “Tell me about your picture.”
  - Communicates to a peer, “I ate huevos [“little eggs” in Spanish].” The huevos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”
  - Communicates in English, “I’m going to cook them now,” while throwing some noodles made with play dough into a toy pot, and later puts “cooked noodles” on a plate and communicates, “Here’s a plate for you,” while handing it to a peer.

---

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
### ELD 3: Understanding and Response to English Literacy Activities

Child shows an increasing understanding of and response to books, stories, songs, and poems presented in English.

#### Discovering Language
- Attends briefly to a familiar adult looking at books, singing songs, or saying rhymes in home language.
- Participates in literacy activities in home language; and
- Attempts to simple literacy activities in English with some support.

#### Discovering English
- Uses home language, gestures, or single words in English to show understanding of literacy activities in English.

#### Exploring English
- Makes faces, gestures, or sounds like a tiger when an adult reads an illustrated poem in English about tigers.
- Gestures at a picture of a baby bear and says, “Baby,” while an adult is reading a book about animals in English to a small group of children.
- Attends to the retelling of a story in English on the flannel board, after the story has been read in child’s home language.
- Comments in home language about a picture in a book, after hearing other children making comments.

#### Developing English
- Repeats the first line of “Five Little Monkeys Jumping on the Bed,” with accompanying hand motions.
- Draws a picture and communicates, “This is spider. This is fly,” after listening to the book *The Very Busy Spider*.
- Communicates to a peer, “Look! Look! Una oruga [“a caterpillar” in Spanish]! Like the book!” while playing outside, after *The Very Hungry Caterpillar* was read aloud in English.

#### Building English
- Brings the book *Rosie’s Walk* to a peer and communicates, “Chicken take a walk. Fox want eat her. Oh, no!”
- Communicates, “Baby bear mad! The girl, she eat it all. Lahat ito!” [“The baby bear is mad! The girl, she ate it all,” in English; “All of it!” in Tagalog] during a teacher-guided discussion in English about *The Three Little Bears*, which has been read aloud and retold on several occasions with props.
- Communicates most of the words of “Five Little Monkeys Jumping on the Bed” and uses flannel-board pieces to show each of the monkeys falling off the bed and bumping his head.

#### Integrating English
- Communicates to a peer, “Sharks have sharp teeth to bite, and they swim fast,” while paging through a book about the ocean.
- Communicates, “My mommy kiss me before I come to school. She say, ‘I love you, hijito.’ Then she goes to work,” while reading *The Kissing Hand* with an adult. [“Hijito” is a term of endearment that is often used with young children in some South American countries.]
- Communicates, “She sat in Papa Bear’s chair. It was enormous [“enormous” in Spanish]. She sat in Baby Bear’s chair. It was teeny and she broke it! She was really scared,” while playing with flannel-board characters in *The Three Little Bears*.

#### Possible Examples
- Looks at pictures in a book for a short time while a familiar adult reads in the home language.
- Reaches to turn the page of a board book as a familiar adult talks or signs in the home language about the pictures on the page.
- Uses simple hand movements to participate during a familiar song or rhyme in the home language.

### Conditional Measure
This measure is not rated: English is the only language spoken in this child’s home.

| **Possible Examples** | - Points to a picture of a bird in a book after seeing or hearing a bird outside.  
  - Shows an adult a book and requests, “Mẹ có thể đọc cho con nghe quyển sách này không?” (“Can you read me this book?” in Vietnamese).  
  - Gestures toward a Chinese character representing own name and says name.  
  - Asks an adult to read a note written in home language by a parent.  
  - Brings tricycle to a stop when a peer holds up a stop sign. | - Demonstrates awareness that pictures or objects can represent people or things  
- Demonstrates awareness that symbols carry meaning or that print in home language carries meaning  
- Points to a caption written in English under a picture and asks an adult, in home language, what it says.  
- Points to the printed word “flower” under a picture of a flower and says, in home language, “That says ‘flower.’”  
- Gestures to the title of a book about trucks and communicates to an adult, in home language, “This book is about trucks.”  
- Asks, in home language or in English mixed with home language, “What letter is this?” while pointing to the first letter of own name on cubby label.  
- Communicates in English, “M,” while gesturing at a letter on a sign written in English during a neighborhood walk (the sign may or may not have the letter M).  
- Gestures toward the letter O on a peer’s name tag after drawing an O in a sand tray. | - Demonstrates understanding that English print consists of distinct letters with names in English  
- Identifies several English letters; and  
- Recognizes own name in English print | - Identifies at least ten English letters; and  
- Identifies a few printed words frequently used in English |

<td>Explores how self or objects fit in or fill up different spaces</td>
<td>Takes into account spatial relationships (e.g., distance, position, direction) and physical properties (e.g., size, shape) when exploring possibilities of fitting objects together or moving through space</td>
<td>There are no later levels for this measure</td>
</tr>
</tbody>
</table>

**Possible Examples**
- Moves hand to mouth.
- Lifts head from an adult's shoulder.
- Stretches while lying on back.
- Moves body parts in basic ways.
- Responds as objects, people, or own body move through space.
- Explores how self or objects fit in or fill up different spaces.
- Explores spatial relationships (e.g., distance, position, direction) or movement of self or objects through space, trying a variety of possibilities.
- Takes into account spatial relationships (e.g., distance, position, direction) and physical properties (e.g., size, shape) when exploring possibilities of fitting objects together or moving through space.

Conditional Measure
- I did not rate this measure because it is not used for documenting progress or planning this child's learning activities and supports.

---

Child is emerging to the next developmental level
Unable to rate this measure due to extended absence
**Developmental Domain: COG — Cognition, Including Math and Science**

**COG 2: Classification**

Child shows an increasing ability to compare, match, and sort objects into groups according to their attributes

<table>
<thead>
<tr>

<td>Later</td>
<td></td>
</tr>
</tbody>
</table>

- **Attends to people, objects, or events**
  - Interacts differently with familiar people and objects than with unfamiliar people and objects
  - Associates a person or object with another person or object, based on a similarity or relationship between them
  - Selects some objects that are similar from a collection of objects
  - Sorts objects into two groups based on one attribute, but not always accurately
  - Sorts objects accurately into two or more groups based on one attribute
  - Sorts objects into two or more groups based on at least two attributes, sometimes sorting by one attribute and then subdividing those groups based on a second attribute

- **Possible Examples**
  - Smiles at a familiar adult’s face or voice.
  - Reaches for own special blanket or toy from home.
  - Closes hand around an adult’s finger.
  - Turns face away from an approaching unfamiliar adult.

- **Responding**
  - Looks at people’s faces.
  - Quiets in response to an adult’s voice.
  - Closes hand around an adult’s finger.

- **Exploring**
  - Selects the shovels from among toys in the sandbox.
  - Takes some apples out of a basket that contains apples and bananas while helping an adult prepare a snack.
  - Picks out some train cars from a box of toys.
  - Separates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.
  - Separates a pile of toy animals by kind (e.g., dogs, cats, and birds).
  - Puts crayons, pencils, and markers into different containers.
  - Sorts buttons by color, and then sorts all of them again by shape or size.
  - Sorts shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).
  - Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.

- **Building**
  - Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.
  - Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).

- **Integrating**
  - Separates flannel-board pieces by type (e.g., shoes, pants, and shirts), and then separates them by adult items and baby items.
### COG 3: Number Sense of Quantity

Child shows developing understanding of number and quantity

<table>
<thead>
<tr>
<th>Developmental Domain: COG — Cognition, Including Math and Science</th>
</tr>
</thead>
</table>

</table>

### Possible Examples

- **Responding**
  - Responds to people or objects in basic ways
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and
  - Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and
  - Recites numbers correctly, up to 20

- **COG 3** Number Sense of Quantity

- **Earlier**
  - Responds to people or objects in basic ways
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and
  - Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and
  - Recites numbers correctly, up to 20

- **Later**
  - Responds to people or objects in basic ways
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and
  - Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and
  - Recites numbers correctly, up to 20

- **Middle**
  - Responds to people or objects in basic ways
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and
  - Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and
  - Recites numbers correctly, up to 20

- **Integrating**
  - Responds to people or objects in basic ways
  - Responds to changes in the number of objects observed or interacted with
  - Demonstrates awareness of quantity
  - Uses number names, but not always correctly, in situations related to number or quantity
  - Identifies small quantities without counting, up to three
  - Counts up to five objects using one-to-one correspondence; and
  - Recites numbers in order, one through ten
  - Shows understanding that the last number counted is the total number of objects in the group
  - Solves simple everyday problems involving numbers by counting up to 10 objects using one-to-one correspondence; and
  - Recites numbers correctly, up to 20

---

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### COG 4: Number Sense of Math Operations

Child shows increasing ability to add and subtract small quantities of objects

#### Developmental Domain: COG — Cognition, Including Math and Science

**COG 4**

<table>
<thead>
<tr>

<td>Demonstrates awareness of quantity</td>
<td>Manipulates objects and explores the change in the number in a group</td>
<td>Demonstrates understanding that adding objects to a group makes more or that taking away objects makes fewer or less</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Responding**
  - Gestures for more when playing with play dough.
  - Dumps small cars out of a bucket.
  - Communicates, “All gone,” after noticing that there is no more fruit in the bowl.

- **Exploring**
  - Puts objects in a dump truck or container, dumps them out, then puts them back in one at a time.
  - Moves toy farm animals into and outside of a toy barn while playing with the farm set.
  - Takes objects from two different piles to create a new pile by using a touchscreen tablet or computer.

- **Building**
  - Notices when another child’s bowl has more crackers than own bowl, and asks an adult to add crackers to own bowl.
  - Communicates, “Ahora tenemos más,” [“Now we have more,” in Spanish] when an adult combines markers from the shelf with some on the table.
  - Communicates, “Tío có một cái và bạn có một cái,” [“I have one and you have one,” in Vietnamese].

- **Integrating**
  - Communicates, “I had four hair clips, but I gave one to my sister. Now I have three.”
  - Brings six napkins to the table after an adult communicates, “We usually have four children, but today we have two visitors, so how many napkins do we need altogether?”
  - Holds up five fingers and then one finger, counts them, and communicates, “Six,” when asked, “If you had five crackers, and you took one more, how many crackers would you have?”

- **Mark the latest developmental level the child has mastered:**

- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### COG 5: Measurement

Child shows an increasing understanding of measurable properties such as size, length, weight, and capacity (volume), and how to quantify those properties

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>

</tr>
</tbody>
</table>

- **Possible Examples**

  - There are no earlier levels for this measure
  - Demonstrates awareness that objects differ by properties (e.g., size, length, weight, or capacity)
  - Explores how objects differ by properties (e.g., size, length, weight, or capacity)
  - Shows understanding of some measurable properties (e.g., size, length, weight, or capacity)
  - Identifies differences in size, length, weight, or capacity between two objects, using comparative words (e.g., “bigger,” “smaller”) or showing understanding of comparative words

- **Possible Examples**

  - Communicates, “Este es más largo,” [“This one is longer,” in Spanish] when placing train tracks side by side to check which is longer.
  - Communicates, “Mine is taller,” when building a block tower next to a peer’s block tower.
  - Fills a measuring cup twice to add two cups of oatmeal during a cooking activity.
  - Uses a balance scale to find out which of two fruits is heavier.
  - Uses footsteps to measure the length of a rug and communicates, “This rug is 10 steps long!”

**Possible Examples**

- Communicates, “This pumpkin is so heavy.”
- Communicates, “My braid goes down my back. It’s long.”
- Chooses the bigger of two buckets when asked to bring the one that will hold more water.
- Communicates, “Este es más largo,” [“This one is longer,” in Spanish] when placing train tracks side by side to check which is longer.
- Communicates, “Mine is taller,” when building a block tower next to a peer’s block tower.
- Fills a measuring cup twice to add two cups of oatmeal during a cooking activity.
- Uses a balance scale to find out which of two fruits is heavier.
- Uses footsteps to measure the length of a rug and communicates, “This rug is 10 steps long!”

**Possible Examples**

- Communicates, “Este es más largo,” [“This one is longer,” in Spanish] when placing train tracks side by side to check which is longer.
- Communicates, “Mine is taller,” when building a block tower next to a peer’s block tower.
- Fills a measuring cup twice to add two cups of oatmeal during a cooking activity.
- Uses a balance scale to find out which of two fruits is heavier.
- Uses footsteps to measure the length of a rug and communicates, “This rug is 10 steps long!”

---

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
## Developmental Domain: COG — Cognition, Including Math and Science

### COG 6: Patterning
Child shows an increasing ability to recognize, reproduce, and create patterns of varying complexity

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Earlier</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Possible Examples
- **Responding**
  - Notices and responds to simple repeating sequences
  - There are no earlier levels for this measure
- **Exploring**
  - Participates in some parts of simple repeating sequences in language, movement, music, everyday routines, or interactions
- **Building**
  - Matches simple sequences that are seen, heard, or experienced
  - Attempts to create simple repeating patterns (with two elements)
- **Integrating**
  - Extends a simple repeating pattern (with two elements) by adding one or more repetitions of an existing pattern
  - Creates, copies, or extends complex patterns (with three or more elements)

**Possible Examples**
- Watches intently and waves hands while adult sings “Open, shut them” song.
- Watches another child hit drum twice, followed by adult hitting the drum twice.
- Pays attention to and attempts to follow the sequence as an adult claps, taps, claps, and taps.
- Follows snack-time routines with reminders to wash hands, go to the snack area, and sit at a table.
- Sings “E-I-E-I-O” and some animal sounds during the song “Old MacDonald’s Farm.”
- Lines up farm animals in the same order as a peer does.
- Repeats series of actions of touching head, shoulders, knees, and toes during the song “Head, Shoulders, Knees, and Toes.”
- Creates a simple repeating pattern using two different stamps, such as circle, star, circle, star.
- Claps, stomps, and then repeats.
- Paints pairs of green and yellow dots, making a pattern of two green, two yellow, two green, two yellow (numbers of dots may not be consistent).
- Continues a simple repeating pattern of drumbeats, started by an adult.
- Builds a fence out of blocks, continuing the pattern begun by a peer: tall block, short block, tall block, short block.
- Extends a simple repeating pattern of colors on a computer, using a touch screen.
- Adds cubes to continue red-yellow-blue pattern.
- Makes up a rhythmic sequence by clapping, patting, and stomping.
- Makes a fruit kebab in a repeating sequence of banana, strawberry, blueberry, banana, strawberry, blueberry, like a fruit kebab that another child is eating.

**Icons**
- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
### COG 7: Shapes

Child shows an increasing knowledge of shapes and their characteristics

<table>
<thead>
<tr>
<th>Developmental Domain: COG — Cognition, Including Math and Science</th>
</tr>
</thead>
</table>

#### COG 7

Child shows an increasing knowledge of shapes and their characteristics

<td>There are no earlier levels for this measure</td>
<td>Explores shapes of objects</td>
<td>Manipulates objects based on shape</td>
<td>Identifies or names several shapes in the environment (e.g., circles, squares, triangles)</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Feels along the edges of a triangle.
- Puts one or two rings on a ring stack.
- Takes out a puzzle piece with a knob and tries to fit it back into a hole of the puzzle, before setting it back down on the table.
- Moves along a line of a circle painted on the pavement in an outdoor play area.
- Puts a square-shaped puzzle piece into the correct hole of a form board.
- Tries a variety of solutions to fit lids on boxes and other containers.
- Puts a circle piece into the correct hole of a shape sorter.
- Places different-shaped blocks on shelves labeled with matching shapes.
- Uses ink stamps to make a row of circles and a row of squares.
- Chooses blocks of the same shape to build a tower with a peer.
- Points to a clock in the room when asked to find a circle during an "I Spy a Shape" game.
- Communicates, “My sandwich is a square,” while holding up a sandwich at lunch.
- Names “square,” “circle,” and “triangle” after exploring each shape piece with hands.
- Points to a clock in the room when asked to find a circle during an "I Spy a Shape" game.
- Communicates, “My sandwich is a square,” while holding up a sandwich at lunch.
- Names “square,” “circle,” and “triangle” after exploring each shape piece with hands.
- Communicates, “This one has a pointy part. This one is curvy,” when examining a triangle and a circle.
- Communicates that a triangle has three sides and a square has four sides.
- Communicates that two sides of a rectangle are longer, but the sides of a square are all the same.

</tbody>
</table>

**Possible Examples**

- **Resonds or shows anticipatory excitement to people, objects, or actions**
  - Widens eyes or opens mouth when a bottle or breast is presented.
  - Quiets in response to an adult’s voice.
  - Orient to a music toy nearby.

- **Repeats actions that have effects**
  - Shakes a rattle, pauses, then shakes it again.
  - Kicks repeatedly at a mobile to make it move.
  - Vocalizes, gains a familiar adult’s attention, and vocalizes again.

- **Responds or shows anticipatory excitement to people, objects, or actions**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.
  - Presses different buttons on a toy and notices what happens.

- **Tries to turn a doorknob after watching an adult open and close the door.**
  - Pulls an adult’s hand to child’s face to continue a game of peek-a-boo.
  - Makes a game of pushing different objects off a table, watching or listening as they fall.
  - Presses different buttons on a toy and notices what happens.

- **Tries to turn a doorknob after watching an adult open and close the door.**
  - Looks up in the sky and points when hearing a loud noise from a plane flying overhead.
  - Pushes on different parts of a toy to try to make music turn on again.

- **Searches for possible causes of actions, events, or behaviors**
  - Pours water into a water wheel to make it spin.
  - Puts a toy car in a tube and watches it roll out the other end when the tube is tilted.
  - Pulls or directs an adult to pull a tab in an interactive book.

- **Acts on objects to cause a specific result**
  - Puts hands over ears before someone pops a balloon or makes another type of loud noise.
  - Requests a hat before going outside on a bright day.
  - Pulls or directs an adult to pull a tab in an interactive book.

- **Acts in ways that take into account an anticipated result**
  - Communicates, “The ice melted and made water because it’s hot in the sun.”
  - Points to wilted leaves on a plant and communicates that the plant needs water.
  - Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

- **Offers possible explanations for why certain actions or behaviors result in specific effects**
  - Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

- **Shows understanding that variations in actions or degrees of actions with the same objects or materials cause different results**
  - Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.

- **Communicates, “If I kick the ball harder, it will go really far!” during outdoor play.**
  - Enlarges the base of a block tower by replacing small blocks with large blocks after the tower keeps falling over.

- **Communicates to a peer about how to feed the fish: “We have to give it a little bit of food every day. If we give it too much, it will get sick.”

- **Uses communication device to describe how a plant grows from a seed.**

---

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

---

**COG 8**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry – Preschool View – August 1, 2015 © 2013-2015 California Department of Education – All rights reserved
**Developmental Domain: COG — Cognition, Including Math and Science**

**COG 9: Inquiry Through Observation and Investigation**

Child observes, explores, and investigates objects (living and nonliving things) and events in the environment and becomes increasingly sophisticated in pursuing knowledge about them.

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>

- **Responding**
  - Responds to people, things, or sounds
- **Exploring**
  - Attends to responses of objects and people that result from own actions
  - Shows interest in people or things in the environment
  - Engages in simple purposeful explorations of familiar objects in the environment
  - Engages in sustained explorations
  - Observes objects and events of interest in the environment, makes simple predictions about them, and checks the predictions
  - Engages in detailed observations and complex investigations of objects and events in the environment (e.g., tests predictions, makes comparisons, uses scientific tools, or tracks changes over time)
- **Building**
  - Draws to planning and carries out detailed observations and complex investigations to answer questions of interest
- **Integrating**
  - Contributes to planning and carries out detailed observations and complex investigations to answer questions of interest

---

### Possible Examples

- **Mark the latest developmental level the child has mastered:**
  - Child is emerging to the next developmental level
  - Unable to rate this measure due to extended absence

<table>
<thead>
<tr>
<th>Possible Examples</th>
<th>Later</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Notices and gazes at own hand.
- Orients toward a person who comes into view or begins talking.
- Looks at a mobile.

- Makes a sound and then waits for adult’s response.
- Mouths an object and then looks at it.
- Bangs objects one at a time and then observes what happens each time.

- Bangs a drum with hands repeatedly.
- Touches hair of another child.
- Watches intently as an adult prepares snack.

- Drops rocks into water and watches what happens.
- Follows a trail of ants to see where they are going.
- Stacks blocks to see how high they can go before falling over.
- Explores how a wind-up toy works that has been placed on the child’s lap.

- Watches a new fish in the tank closely for several minutes, then calls a peer over to watch the fish, too.
- Digs “road” in sand, pours in water, and then checks to see if water ran to the end.
- Notices a drooping plant and comments, “How can we make it better?” and tries different ways to support it, such as holding it or leaning it against something.
- Picks up a snail after observing it for a while. Then asks, “Where did its head go?” when the snail goes into its shell.

- Indicates that a “roly-poly” bug will roll up into a ball if touched, and then checks by touching it.
- Communicates that when you add water to flour, that the flour will be sticky, during a small group activity led by an adult.
- Predicts that paint will turn purple while watching an adult mix together blue and red paint.

- Predicts that a rock is heavier than a shell, and then uses a balance scale to show that the rock is heavier.
- Communicates that a tennis ball will go down the ramp faster than a plastic ball, but more slowly than a golf ball, and then rolls the balls several times to see which reaches the bottom first.
- Communicates that a ten-pin bowling ball will go down the ramp faster than a plastic ball, but more slowly than a golf ball, and then rolls the balls several times to see which reaches the bottom first.
- Participates in making a chart to compare change, over time, in the growth of bean plants, and communicates, “I think this bean plant grew taller because it got more sun next to the window.”

- Participates in making a chart of how much the temperature changed each day, during a small group activity led by an adult.
- Predicts that a rock is heavier than a shell, and then uses a balance scale to show that the rock is heavier.
- Communicates that a tennis ball will go down the ramp faster than a plastic ball, but more slowly than a golf ball, and then rolls the balls several times to see which reaches the bottom first.

---

</table>

**Possible Examples**

- **Points to bunny in its pen, then points to picture of a bunny.**
- **Touches toy oven and communicates, “hot.”**
- **Communicates, “Lunch!” after observing plates of food come to the table.**

- **Watches a bird outside, gets an adult’s attention, and then pretends to be a bird by flapping arms and making sounds like a bird.**
- **Walks through a puddle, stomping feet hard to splash the water, and communicates that child can make a big splash.**
- **Communicates, “La pelota es grande,” [“The ball is big,” in Spanish] while trying to pick up a large beach ball.**

- **Gathers several rocks while outside and indicates which are heavy and which are light.**
- **Communicates, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”**
- **Communicates, “The grapefruit is big. The lemon is small.”**
- **Uses sign language to describe what a worm feels like and what a caterpillar feels like.**

- **Look at an ant through a magnifying glass, and then draws a simple picture of what it looked like.**
- **Communicates, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”**
- **Communicates, “The grapefruit is big. The lemon is small.”**
- **Uses sign language to describe what a worm feels like and what a caterpillar feels like.**

- **Looks at an ant through a magnifying glass, and then draws a simple picture of what it looked like.**
- **Communicates, “This one has a leaf, but that one doesn’t,” after an adult asks, “How are our plants doing?”**
- **Communicates, “The grapefruit is big. The lemon is small.”**
- **Uses sign language to describe what a worm feels like and what a caterpillar feels like.**

- **Draws a picture of a butterfly and communicates about its body parts, showing the head, legs, and four wings.**
- **Holds and looks at a caterpillar closely, and asks an adult to write down, “It’s wiggling. It tickles.”**
- **Commits, “The grapefruit is big. The lemon is small.”**
- **Uses sign language to describe what a worm feels like and what a caterpillar feels like.**

- **Draws a picture of a recent rainstorm, including clouds, slanted raindrops, puddles, and lightning, and shares it with peers.**
- **Sorts flannel-board animals into two columns—animalsthat live in the water and animals that live on land—and communicates, “Some animals that live in the water have fins.”**
- **Collaborates in collecting data, using tally marks to show objects that stick to a magnet and objects that do not, and shares results in a discussion facilitated by an adult.**
- **Draws a picture of a recent rainstorm, including clouds, slanted raindrops, puddles, and lightning, and shares it with peers.**
- **Sorts flannel-board animals into two columns—animals that live in the water and animals that live on land—and communicates, “Some animals that live in the water have fins.”**

- **Draws a picture of a recent rainstorm, including clouds, slanted raindrops, puddles, and lightning, and shares it with peers.**
- **Sorts flannel-board animals into two columns—animals that live in the water and animals that live on land—and communicates, “Some animals that live in the water have fins.”**

- **Draws a picture of a recent rainstorm, including clouds, slanted raindrops, puddles, and lightning, and shares it with peers.**

## Developmental Domain: COG — Cognition, Including Math and Science

### COG 11: Knowledge of the Natural World

Child develops the capacity to understand objects (living and nonliving things) and events in the natural world, including how they change and their characteristics.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>

<td>Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts</td>
<td>Responds to sensory information by moving body or limbs to reach for or move toward people or objects</td>
<td>Uses sensory information to control body while exploring people, objects, or changes in the physical environment</td>
<td>Demonstrates awareness of major body parts by exploring their movement potential</td>
</tr>
<tr>
<td>Tries different ways to coordinate movements of large or small body parts</td>
<td>Adjusts, with adult guidance, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects</td>
<td>Anticipates and then adjusts, on own, aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces</td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- Turns head in response to a light being turned on.
- Quiets in response to an adult singing.
- Responds to being touched on the cheek.

- Moves toward a familiar adult while being picked up.
- Bats or kicks at a hanging mobile.
- Turns toward, then grasps, a rattle being shaken.
- Gazes at, then reaches toward, glasses on someone’s face.
- Shifts body to stabilize it, in order to reach up toward an adult’s face while sitting on the adult’s lap.
- Reposes body in order to manipulate levers and buttons on a busy box.
- Dabs fingers in water before placing whole hand in.
- Pats play dough with whole hand, then leans forward to roll it.
- Participates in songs or games requiring movement of specific body parts.
- Moves arm up and down, with increasing momentum, to shake bells louder.
- Uses arms to push against a container of wooden blocks that does not move, then leans body forward to push harder.
- Changes movements when dancing with scarves.
- Starts and stops movements of different body parts during a freeze-dance game.
- Moves over, under, around, and through large objects in an obstacle course, sometimes bumping them.
- Avoids bumping into orange cones on a path for wheel toys by moving around them, after an adult points to the cones.
- Raises knees high when following an adult marching.
- Moves away from a nearby child after an adult communicates, “Make sure you have enough room to stretch without bumping your neighbor.”
- Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
- Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.
- Uses feet to slow self when coming down a ramp.
- Reaches for a small pitcher of milk without bumping into other objects on the table during lunch.
- Moves other wheel toys closer together to make room for a new wheel toy when putting it away during outdoor play.
- Tries several different ways to move through sections of a new obstacle course.
- Walks carefully after slipping on wet leaves or grass during a nature walk.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
Developmental Domain: PD-HLTH — Physical Development–Health

**PD-HLTH 2: Gross Locomotor Movement Skills**

Child shows increasing proficiency in fundamental locomotor skills (e.g., rolling, crawling, cruising, walking, running, jumping, galloping)

---

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td>Moves in basic and often involuntary ways</td>
<td>Moves two or more body parts together, often with intention</td>
<td>Coordinates movements of body parts to move whole body, such as creeping, crawling, or scooting on bottom</td>
<td>Coordinates movement of whole body while upright, using support</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Turns head in response to stimulation or nourishment.
  - Turns head to seek source of stimulation or nourishment.
  - Responds involuntarily to a sudden loud noise or movement by extending arms and legs.

- **Exploring**
  - Turns head and reaches for a toy.
  - Kicks at a mobile when lying on back.
  - Rolls from stomach to back or from back to stomach.
  - Creeps or crawls toward a familiar adult.
  - Moves from lying down to a sitting position.
  - Moves by rolling body on the floor.
  - Moves by using arms to pull self forward.
  - Takes steps sideways or forward while holding onto furniture.
  - Walks forward steadily while pushing a cube chair.
  - Pulls up to a standing position while grasping an adult’s hands.
  - Stands up with support of a mobility aid, such as a walker.

- **Building**
  - Walks forward with a wide base (legs farther apart) and arms held high.
  - Stands up from squatting, unassisted, after picking up a toy.
  - Walks with one object in each hand.
  - Moves by rolling body on the floor.
  - Moves by using arms to pull self forward.

- **Integrating**
  - Runs with short strides, and sometimes has difficulty stopping.
  - Moves along a low balance beam or along the side of a curb, stepping sideways.
  - Navigates changes in surface and direction, using a mobility aid, such as a walker.
  - Runs fast with long stride and speed, consistently showing arm and leg opposition (e.g., right arm and left leg).
  - Changes direction and stops quickly and easily while running.
  - Swings arms back and then forward in preparation for jumping.
  - Moves wheelchair through an obstacle course, first going straight, then turning quickly, then turning quickly again.

---

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
### Developmental Domain: PD-HLTH — Physical Development—Health

#### PD-HLTH 3: Gross Motor Manipulative Skills
Child shows increasing proficiency in gross motor *manipulative skills* (e.g., reaching, kicking, grasping, throwing, and catching)

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

**Moves in basic and often involuntary ways**

- Kicks legs.
- Extends arm.
- Flexes foot.

**Possible Examples**

- Kicks against a nearby object.
- Rolls onto side, toward an object, while lying on a blanket.
- Reaches toward a familiar adult, using both arms.
- Kicks legs.
- Extends arm.
- Flexes foot.
- Bangs a cup on a table.
- Splashes in water.
- Kicks table leg while seated for snack.
- Moves to a ball, pushes it away, then moves toward it and pushes it again.
- Picks up and drops blocks while holding onto a low table.
- Sits with legs apart and traps a rolling ball with arms.
- Moves toward a large container while holding onto a beanbag, and then drops beanbag inside the container.
- Crawls under table to retrieve a block; then crawls back out while holding the block.
- Raises arm to throw a beanbag without moving feet, but loses balance.
- Approaches a stationary ball, stops, and pushes ball with foot, then steadies self.
- Catches a ball while in a stationary position, using arms to bring it in and hold it against body.
- Practices throwing a ball by bringing it behind the head, sometimes dropping it but continuing the arm motion.
- Bends knees and jumps up to move a parachute or bed sheet that is also being held by others, sometimes losing grasp.
- Swings leg back to kick a stationary ball while standing in place.
- Hands out carpet squares to peers at circle time, sometimes dropping them.
- Catches a stuffed animal, with hands, keeping arms extended, and then uses hands to hold onto it.
- Strikes a ball off a cone, using a bat, with a horizontal swing and rotation of upper trunk.
- Runs up to a stationary ball, plants foot next to the ball, and then swings leg for a forceful kick.
- Uses hands to catch a beanbag tossed to either side of the body.
- Runs, with arm and leg opposition (e.g., left foot forward, right arm back), to try to catch a butterfly with a net.
- Runs and kicks a moving ball forcefully, showing arm and leg opposition (e.g., left food forward, right arm back), maintaining balance.
- Bounces a ball several times while walking.

Mark the latest developmental level the child has mastered:

</tr>
</tbody>
</table>

**Possible Examples**

- Curls fingers around an adult’s finger.
- Brings fist to mouth.
- Makes small movements of arms and hands near the sides of body.
- Holds a stuffed toy against body.
- Pulls an object closer, using a raking motion.
- Pushes hands against an adult.
- Uses fingers and palm to grasp toys of different shapes or sizes.
- Holds a stacking ring with full fist.
- Holds a spoon with full fist while being fed by an adult with another spoon.
- Holds a spoon, using thumb and fingers.
- Pinches cereal pieces between finger and thumb.
- Picks up a stacking ring, using fingers and thumb.
- Holds a cup to mouth with both hands, but may spill some.
- Scrubbles back and forth on pavement with sidewalk chalk, using one hand.
- Grasps and turns a doorknob, but may not have strength or coordination to open the door.
- Holds play dough with one hand while cutting it with a wooden knife.
- Steadies a container of block accessories on lap while picking out the tree-shaped blocks.
- Scoops sand into a container with one hand while holding the container with other hand.
- Uses scissors to cut out simple shapes (e.g., circle, square) on paper.
- Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.
- Peels a banana or orange after adult starts the peel.
- Unfastens buckle on chest strap of wheelchair.
- Fastens snaps on pants made of thicker, stiffer materials, such as denim jeans.
- Takes a cap off of a marker by twisting with one hand, then pulling with both hands in opposite directions.
- Takes the peel on a banana or mandarin orange.
- Makes a necklace by stringing a variety of small beads with narrow holes.
- Takes a cap off of a marker by twisting with one hand, then pulling with both hands in opposite directions.
- Makes a necklace by stringing a variety of small beads with narrow holes.
- Takes the peel on a banana or mandarin orange.
- Makes a necklace by stringing a variety of small beads with narrow holes.
- Takes the peel on a banana or mandarin orange.

<td></td>
</tr>
</tbody>
</table>

#### Possible Examples

- Starts after hearing a loud noise.
- Closes eyes in response to a bright light.
- Cries when touched by a cold washcloth.
- Turns away from a familiar adult after the adult's grip loosens while child is being carried.
- Cries and looks for a familiar adult for comfort after falling down.
- Stops running and walks after a familiar adult communicates, "Use walking feet.”
- Pats the classroom pet gently when a familiar adult communicates, “Gentle touches.”
- Accepts a familiar adult’s hand and holds it when requested to before crossing the street.
- Stops and reaches for an adult's hand when approaching a crosswalk.
- Tries to buckle own seat belt as an adult buckles other children in a multi-child stroller.
- Seeks adult assistance to use a step stool in order to obtain an object out of reach.
- Cleans up spills during a cooking activity.
- Waits turn to climb ladder on outside play equipment, with an adult reminder.
- Slows tricycle as a peer approaches.
- Stays behind the boundaries set up by adults to designate the swing-set area.
- Follows classroom safety rules when using scissors, such as holding scissors with blade pointed down.
- Brings helmet for an adult to put on child's head before riding a tricycle on a family walk.
- Explains, “I wait for the walk sign and hold my mom's hand before I cross the street.”
- Holds out arm to stop a peer from walking through a spill on the floor.
- Communicates, “Slow down! No running inside!” to a peer.

---

* Children at the Building Later and Integrating Earlier levels still need adult supervision to carry out safety practices on their own.

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
### Personal Care Routines: Hygiene

#### Developmental Domain: PD-HLTH — Physical Development—Health

**PD-HLTH 6: Personal Care Routines: Hygiene**

Child increasingly responds to and initiates personal care routines that support hygiene

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>

<tr>
<td><strong>Earlier</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Possible Examples

- Looks at an adult's face, or quiets, during a diaper change.
- Closes eyes when face is washed.
- Kicks legs during a diaper change.

**Responds in basic ways during personal care routines that involve hygiene**

- Pulls at diaper or pants when diaper needs to be changed.
- Puts hands under a faucet before an adult starts to turn on the water.
- Turns head toward or away from a tissue when an adult tries to wipe child's nose.

**Responds in ways that demonstrate awareness of a hygiene routine**

- Attends to an adult's actions during diapering routine.
- Grabs for the washcloth as an adult washes child's face.
- Shows excitement during bath time.

**Anticipates one or two steps of a hygiene routine**

- Communicates to an adult the need for help with toileting or for a diaper change.
- Rubs hands together under a faucet after an adult turns the water on.
- Tries to blow nose into a tissue held by an adult.

**Participates in own hygiene routines, with an adult**

- Uses toilet (pulls down pants, sits, etc.), but may need an adult's assistance with wiping.
- Gets a tissue and wipes own nose, with adult guidance to then throw tissue away and wash hands.
- Gets own toothbrush and gives it to an adult after meals when asked.

**Carries out some steps of own hygiene routines, with specific adult guidance or demonstration**

- Uses the toilet on own, and flushes after adult reminder.
- Washes and partially dries hands, and then dries them completely when suggested to by an adult.
- Takes toothbrush after an adult puts on toothpaste, begins to brush teeth, but needs to be reminded to brush teeth in the back of the mouth.

**Carries out most steps of familiar hygiene routines, with occasional reminders of when or how to do them**

- Uses toilet on own, sometimes forgetting to do one step, such as washing hands.
- Washes hands before eating and usually remembers to use soap.
- Gets a toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

**Initiates and carries out most steps of familiar hygiene routines on own**

- Uses toilet on own, completing all steps, including washing hands.
- Coughs and sneezes into elbow most of the time.
- Goes to brush teeth after lunch, brushes teeth, and puts away toothbrush on own.

- Uses toilet on own, and washes hands.
- Gets a toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### Developmental Domain: PD-HLTH — Physical Development–Health
### PD-HLTH 7: Personal Care Routines: Feeding
Child responds to feeding and feeds self with increasing proficiency

#### Mark the latest developmental level the child has mastered:

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### Possible Examples

- Turns toward an adult’s touch during feeding.
- Sucks on the nipple of a bottle or breast.
- Gazes at or nuzzles up to an adult when feeding.
- Closes lips around food on a spoon.
- Puts one or both hands on a bottle or breast while being held during feeding.
- Reaches for a spoon while being fed.
- Shows excitement as an adult approaches with a bottle or bowl.
- Feeds self small pieces of food, such as cereal or cheese, with fingers or whole hand.
- Feeds self small pieces of food, such as cereal or cheese, with fingers or whole hand.
- Eats soft food, such as yogurt or applesauce, from a bowl, using a spoon, with adult sometimes assisting with scooping.
- Drinks from a cup while an adult guides the cup.
- Uses adaptive utensils to feed self a meal when positioned functionally.
- Serves self from a serving bowl, using a large spoon, while someone else holds the bowl.
- Cuts foods with a small plastic knife.
- Takes the shell off of a hard-boiled egg.

* * Required for children with IFSPs and IEPs.

---

* Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence

#### Conditional Measure

○ I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports
## Developmental Domain: PD-HLTH — Physical Development–Health

**PD-HLTH 8: Personal Care Routines: Dressing**

Child develops and refines ability to participate in and take responsibility for dressing self

<table>
<thead>
<tr>

<td><strong>Later</strong></td>
</tr>
</tbody>
</table>

**Responds in basic ways during dressing**

**Possible Examples**

- Cries or fusses when diaper is changed.
- Looks at adult while being dressed.
- Blinks eyes as clothing is placed over head.
- Shifts body as an adult puts a clean diaper on child.
- Squirms to avoid having shirt being pulled over the head while being dressed.
- Allows an adult to move child’s arms while removing child’s jacket.
- Extends arms out when an adult approaches with a jacket.
- Leans toward an adult while a shirt is being put on child.
- Sits down and extends feet for an adult to put shoes on child.
- Pushes arms through the sleeves of a shirt held by an adult.
- Lifts smock for an adult to pull it over child’s head.
- Slips foot into shoe while an adult holds it open.
- Lifts one leg, then the other, while an adult guides child’s legs into pants.
- Puts legs through pant legs with adult assistance, and then pulls up pants on own.
- Puts on own jacket as an adult holds it open or lays it out.
- Puts feet into shoes on own.
- Pulls on loose-fitting socks on own.
- Puts feet into shoes on own.
- Pulls on own jacket and fastens tabs.
- Buttons own jacket.
- Zips and snaps own pants.

**Possible Examples**

- Puts on own shoes and ties or tabs fastened.
- Changes into T-shirt and sweatpants on own after water play.

---

* Required for children with IFSPs and IEPs.

---

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### PD-HLTH 9: Active Physical Play

Child engages in physical activities with increasing endurance and intensity*

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>

</tr>
<tr>
<td>Middle</td>
<td>Middle</td>
<td>Middle</td>
<td>Middle</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Earlier</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - There are no earlier levels for this measure
  - Engages in brief instances of physical play
  - Engages in active physical play for short periods of time
  - Engages in active physical activities or play for moderate amounts of time
  - Engages in active physical activities or play for sustained periods of time, with occasional bursts of intensity
  - Engages regularly in active physical activities or play routinely, with increased intensity and duration

- **Responding**
  - Engages in physical activities with increasing endurance and intensity*

*Intensity of active physical play and amount of strength required to engage in the activity will vary greatly from child to child. When observing a child, it is important to consider the child’s capacity for engaging in vigorous active physical play, in which a child’s heart is beating faster and the child is breathing harder than is typical for the child when engaged in daily activities or routines.*

[Mark the latest developmental level the child has mastered:](#)

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

**Possible Examples**

- Selects a banana when offered choice between a banana and an apple.
- Selects a carrot when offered a choice between carrots and celery.
- Chooses the picture of milk when offered a choice between water and milk.
- Accepts a variety of foods offered from a serving plate.
- Explores unfamiliar foods that are placed on a plate.
- Observes others’ reactions when they eat food items that are unfamiliar to child.
- Identifies several pretend food items when playing restaurant with a peer.
- Makes different pretend food items, such as a tortilla and a pizza, with play dough.

- Communicates, “Me gustan las bananas y las manzanas,” [“I like bananas and apples,” in Spanish] when selecting bananas and apples from a plate of sliced fruit.
- Communicates, “This rice is sticky.”
- Communicates, “This rice is sticky.”
- Communicates, “I like mangos. They’re sweet.”
- Purses lips together and shakes head, “No,” when offered a slice of lemon to taste while making lemonade.
- Communicates during pretend play, “First we eat vegetables, and later we can have dessert.”
- Communicates, “First we eat vegetables, and later we can have dessert.”
- Chooses primarily pictures of fruits and vegetables to create a collage of healthful foods.
- Chooses to drink water instead of lemonade during snack time.

- Communicates, “This rice is sticky.”
- Communicates, “I like mangos. They’re sweet.”
- Purses lips together and shakes head, “No,” when offered a slice of lemon to taste while making lemonade.
- Communicates during pretend play, “First we eat vegetables, and later we can have dessert.”
- Communicates, “First we eat vegetables, and later we can have dessert.”
- Chooses primarily pictures of fruits and vegetables to create a collage of healthful foods.
- Chooses to drink water instead of lemonade during snack time.

- Tells a peer, “Milk is good for my teeth.”
- Brings pretend soup to a peer who is pretending to be ill, to make the peer feel better.
- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.

- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.

- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.

○ Child is not yet at the earliest developmental level on this measure

○ Child is emerging to the next developmental level

○ Unable to rate this measure due to extended absence

---

**PD-HLTH 10** Nutrition

**PD-HLTH 10**
**Developmental Domain: HSS — History–Social Science**

**HSS 1: Sense of Time**
Child increasingly communicates or demonstrates awareness about past and future events and relates them to present activity

### Mark the latest developmental level the child has mastered:

<table>

</tbody>
</table>

**Possible Examples**
- **Responding**
  - There are no earlier levels for this measure
- **Exploring**
  - Participates in the steps of a familiar routine or activity
  - Anticipates familiar routines, people, activities, or places
  - Communicates about past events and future events, but is sometimes unclear about how far in the past they happened or how far in the future they will happen
  - Plans for the near future
  - Communicates about past events and future events, and asks about activities that will happen soon
  - Distinguishes what happened a long time ago from what happened in the recent past, and distinguishes what will happen in the near future from what will happen much later

- **Building**
  - Communicates about seeing a dog and a squirrel, after coming back from a walk.
  - Communicates to an adult, when coming into a room, “We dug in the dirt and planted seeds.”
  - Communicates to an adult that the firemen came to visit yesterday, even though they actually came two weeks ago.
  - Communicates, using a communication board, “I will be in this school this year, but next year, I will be at my sister’s school.”
  - Communicates, “下個星期我媽媽要過生日, 今天我要給媽媽做個賀卡,” “I’m going to make a card today for my mom’s birthday next week,” in Vietnamese.

- **Integrating**
  - Goes to wash hands when other children go to wash hands.
  - Puts backpack and coat in cubby during morning arrival.
  - Puts plate into dishes bin after lunch.
  - Goes to wash hands when other children go to wash hands.
  - Puts backpack and coat in cubby during morning arrival.
  - Puts plate into dishes bin after lunch.
  - Communicates about seeing a dog and a squirrel, after coming back from a walk.
  - Communicates to an adult, when coming into a room, “We dug in the dirt and planted seeds.”
  - Communicates to an adult that the firemen came to visit yesterday, even though they actually came two weeks ago.
  - Communicates, using a communication board, “I will be in this school this year, but next year, I will be at my sister’s school.”
  - Communicates, “下個星期我媽媽要過生日, 今天我要給媽媽做個賀卡,” “I’m going to make a card today for my mom’s birthday next week,” in Vietnamese.
### Developmental Domain: HSS — History–Social Science

**HSS 2: Sense of Place**

Child demonstrates increasing awareness of the characteristics of physical environments and connections among their attributes, including the people and activities in them.

---

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>

</tr>
<tr>
<td>Later</td>
<td></td>
<td>Later</td>
<td>Middle</td>
<td></td>
</tr>
</tbody>
</table>

- There are no earlier levels for this measure

#### Possible Examples

- Participates in activities that are related to specific environments
- Recognizes or navigates familiar environments, anticipating the people and activities routinely associated with them
- Recognizes the changes in familiar environments or in the people associated with them (e.g., a new adult in the classroom)
- Communicates about the relative distances between familiar locations, including details about those locations
- Compares unfamiliar locations (e.g., other communities) with familiar ones, identifying the characteristics or people associated with them

- Puts paint brushes back in holder before leaving paint area.
- Puts cars into car bin during clean-up time.
- Puts picture into the “Who’s here today?” pocket chart hanging near the classroom door during morning arrival.
- Shows cubby to family member upon arrival at child care.
- Goes to the sink to wash hands before finding a place at the table for breakfast.
- Takes an adult’s hand after being helped with putting on a jacket, and then points outside to the sandbox.
- Asks, “¿Quién es ella?” (“Who’s that?” in Spanish) when a peer’s grandma comes to visit.
- Looks closely at new block-shaped pictures attached to a shelf before placing blocks on the appropriate shelf, during clean-up time.
- Communicates to an adult, “Where are the puzzles?” after going to the shelf where puzzles are usually kept and finding that the puzzles are not there.
- Goes to area with dress-up clothes after noticing peer wearing something newly added to the dress-up area.
- Communicates, “We go that way,” while on the way down the hall from the classroom to the bathroom.
- Uses a communication board to ask to go by a favorite playground, when planning a walk.
- Communicates, “This is the wrong way!” when mother takes an unfamiliar route to the grocery store.
- Communicates, “It snows where my auntie lives, but not here because it’s hot.”
- Communicates that school is close to child’s house, but child’s aunt’s house is far away.
- Communicates, after passing the post office while on a neighborhood walk with an adult, that they are almost to the fire station.
- Communicates about driving in a car to see one grandma who lives nearby, but going on a plane to see another grandma who lives far away.
- Communicates, “That grocery store is outside! Not like our grocery store.”

- Communicates, “It snows where my auntie lives, but not here because it’s hot.”
- Draws pictures of houses on farms and apartments in cities after an adult reads a story about different types of homes where people live.
- Describes a trip to a farmers’ market and communicates, “That grocery store is outside! Not like our grocery store.”

---

- Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### Developmental Domain: HSS — History–Social Science

#### HSS 3: Ecology
Child develops an awareness of and concern for the natural world and human influences on it

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>
<td>Later</td>
</tr>
<tr>
<td>There are no earlier levels for this measure</td>
<td>Demonstrates awareness of living things in the environment, especially animals</td>
<td>Explores living things in the environment, especially animals</td>
<td>Demonstrates simple understanding that people tend to the basic needs of plants and animals (e.g., watering and feeding)</td>
<td>Demonstrates simple understanding of the effects that humans have on the environment beyond own direct experience (e.g., natural habitats for animals, climate change, clean air, clean water)</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Points to the class guinea pig in a cage.
- Notices a bug near the sandbox.
- Looks briefly as butterfly goes by.
- Turns toward a barking dog.
- Smells blossoms or feels leaves of a plant.
- Follows around or tries to pet a neighbor’s cat or dog, as reported by a family member.
- Watches goldfish intently as it swims in the fish tank.
- Feeds the fish, with adult assistance in measuring the food.
- Communicates about helping daddy feed the dog because it was hungry.
- Comments that the boy in a story watered his pumpkin seed so it would grow.
- Communicates that a pet’s cage needs to be cleaned.
- Communicates that the bunny needs to be in the shade.
- Communicates that the garden needs to be planted in the sun, not under a tree where there is too much shade.
- Puts a blanket down to make a soft bed for the dog in pretend play.
- Communicates that a pet’s cage needs to be cleaned.
- Communicates that the bunny needs to be in the shade.
- Communicates that the garden needs to be planted in the sun, not under a tree where there is too much shade.
- Pours water around base of newly planted flowers rather than on top of the plant.
- Communicates to another child that paper scraps go into the recycling bin, pointing to bin label for guidance.
- Communicates to another child that paper scraps go into the recycling bin, pointing to bin label for guidance.
- Removes a blanket to make a soft bed for the dog in pretend play.
- Communicates to another child, “Just use one paper towel so we can save trees.”
- Communicates to peers, “Huwag mo ng ihagis ang basura sa tubig, Nakasasakit ito sa isda,” (“Don’t throw stuff in the water. It hurts the fish,” in Tagalog).
- Reminds a peer to turn the water all the way off while washing hands, to help save water.

- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
**HSS 4: Conflict Negotiation**
Child shows increasing understanding of the needs of other children and is increasingly able to consider alternatives and to negotiate constructively in conflict situations

### Possible Examples

- **Responding**
  - Takes action to get needs or wants met without considering impact on others or self
  - There are no earlier levels for this measure

- **Exploring**
  - Takes the initiative to get needs or wants met, considering impact on others or self

- **Building**
  - Uses words or gestures to express desires in some conflict situations, but requires adult assistance to communicate constructively and resolve conflict

- **Integrating**
  - Uses appropriate words and actions to express desires in response to conflict situations, and suggests simple cooperative solutions based mainly on own needs

### Examples of Conflict Negotiation

- **Earlier**
  - Reaches for food on another child’s plate.
  - Takes an object of interest away from another child.
  - Walks into the middle of an area where other children are playing, inadvertently knocking over materials that other children are using.
  - Steps in front of other children who are waiting to take their turn.

- **Middle**
  - Becomes upset and tries to take back a marker when another child takes it away, but calms down when an adult brings more markers.
  - Pushes against a peer who is sitting too close on the rug, until an adult asks the group to move back to make the circle bigger.
  - Bursts into tears and turns to an adult for comfort when another child takes a toy.

- **Later**
  - Communicates, “I want the ball,” while trying to take a ball away from a peer, but stops after an adult says, “He is using it now. Let’s find another one.”
  - Holds tightly onto a doll until an adult encourages, “Let her know you’re not done playing with the baby.” Then communicates, “My baby, my turn,” to another child.
  - Communicates that child will read a different book than a peer, and that, when they are both finished, they can trade books, when the peer indicates interest in the book the child is reading.

- **Responding**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Exploring**
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Building**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.
  - Responds to a peer’s request for crayons by suggesting that they share the box of crayons, but removes favorite crayons before sharing.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.
  - Responds to a peer’s request for crayons by suggesting that they share the box of crayons, but removes favorite crayons before sharing.

- **Integrating**
  - Communicates to a peer’s request for crayons by suggesting that they share the box of crayons, but removes favorite crayons before sharing.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.

- **Integrating**
  - Communicates to another child in the block area, “I’m playing with the blocks. You can play with the cars.”
  - Communicates, “You can have a turn after me,” to another child who wants to use the big shovel in the sandbox.

- **Integrating**
  - Communicates, “I’m sitting here,” while looking at an adult for support, as another child squeezes onto the same carpet square.
  - Communicates to a peer that child is still playing with a toy when the peer tries to take the toy away.
  - Seeks an adult and indicates that another child won’t give child a turn on the tricycle, after waiting for a turn.
### Developmental Domain: HSS — History–Social Science

#### HSS 5: Responsible Conduct as a Group Member

Child develops skills as a responsible group member in an early education setting, acting in a fair and socially acceptable manner and regulating behavior according to group expectations.

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>

<td>Possible Examples</td>
<td>There are no earlier levels for this measure</td>
<td>Takes action to get needs or wants met without considering impact on others</td>
<td>Needs specific adult guidance to cooperate with group expectations</td>
<td>Follows through with group expectations during own activities, needing adult reminders to follow expectations from beginning to end</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Takes toys handed by an adult one by one at clean-up time and puts them on the shelf to help.
  - Joins a group for lunch after an adult encourages child to come to the table.
  - Makes room for another child to sit when adult communicates that the other child needs more space.
  - Stops building a road with blocks and begins to put away blocks when an adult models for child and sings the “clean up” song.
  - Returns from computer to hang up smock when an adult says, “You need to put your smock away at the easel before taking your turn at the computer.”
  - Begins to get on a tricycle with another peer, but stops when an adult says, “We take turns with the trike, and your turn is next.”
  - Follows morning routine of putting away belongings, but then needs adult reminder before washing hands and going to the breakfast table.
  - Rides on the bike path for several laps on a wheeled toy, after being reminded by an adult to stay on the path so that everyone is safe.
  - Follows expected steps of putting away toys, putting on coat, and sitting on the rug to wait to go outside, after being shown a visual schedule depicting the sequence of steps.

- **Exploring**
  - Continues playing while other children are cleaning up during clean-up time.
  - Reaches for food on another child’s plate.
  - Takes an object of interest away from another child.
  - Steps in front of other children who are waiting to take their turn.

- **Building**
  - Takes toys handed by an adult one by one at clean-up time and puts them on the shelf to help.
  - Joins a group for lunch after an adult encourages child to come to the table.
  - Makes room for another child to sit when adult communicates that the other child needs more space.
  - Stops building a road with blocks and begins to put away blocks when an adult models for child and sings the “clean up” song.
  - Returns from computer to hang up smock when an adult says, “You need to put your smock away at the easel before taking your turn at the computer.”
  - Begins to get on a tricycle with another peer, but stops when an adult says, “We take turns with the trike, and your turn is next.”
  - Follows morning routine of putting away belongings, but then needs adult reminder before washing hands and going to the breakfast table.
  - Rides on the bike path for several laps on a wheeled toy, after being reminded by an adult to stay on the path so that everyone is safe.
  - Follows expected steps of putting away toys, putting on coat, and sitting on the rug to wait to go outside, after being shown a visual schedule depicting the sequence of steps.

- **Integrating**
  - Follows through with group expectations on own during extended activities.
  - Communicates about group expectations; and Cooperates with others in carrying group expectations.

### Possible Examples

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

---

**HSS 5**

**Responsible Conduct as a Group Member**

DRDP (2015): A Developmental Continuum from Early Infancy to Kindergarten Entry — Preschool View — August 1, 2015 © 2013-2015 California Department of Education — All rights reserved

Page 52 of 58
### Developmental Domain: VPA — Visual and Performing Arts

#### VPA 1: Visual Art

Child engages, develops skills, and expresses self with increasing creativity, complexity, and depth through two-dimensional and three-dimensional visual art.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

#### Possible Examples

- Dabs dot markers on paper repeatedly, with different degrees of pressure.
- Uses a paintbrush to paint with water on various outdoor surfaces.
- Squeezes dough in hands, feeling it ooze between fingers.
- Paints with fingers, hands, or feet.
- Uses crayons, pencils, or markers to make back-and-forth marks.
- Finger paints to fill up a piece of paper with paint.
- Rolls play dough into a ball.
- Combines lines and circles, when painting with paintbrushes, to symbolize familiar things (e.g., houses, trees, people).
- Rolls clay into balls, and shapes balls into pretend food, such as tortillas, hot dogs, or pancakes.
- Glues collage materials on a paper plate, using both two-dimensional materials (paper, fabric) and three-dimensional materials (feathers, pine cones, or leaves).
- Draws a familiar thing (e.g., sun, flower, house) on paper with a crayon or marker.
- Rolls and stacks balls of clay in order to make a head and body.
- Tries out different pieces of colored paper to create a flower.
- Draws a familiar thing using a touch screen.
- Paints a picture of a brown boat in a blue lake.
- Draws human figures (circles with faces) and adds hands and legs extending directly from the circles to show familiar actions, such as reaching and kicking a ball.
- Tapes two toilet paper rolls together to make binoculars, and then attaches yarn as a neck strap.
- Draws a scene with animals in enclosures and people watching them, after a trip to the zoo.
- Paints teardrops below the eyes on a face to show sadness.
- Creates a mobile of a sun and paper flowers with happy faces.
- Glues wooden sticks together and weaves colorful yarn around them to make a dream catcher.

---

○ Child is not yet at the earliest developmental level on this measure
○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
## VPA 2: Music

Child expresses and creates by making musical sounds, with increasing intentionality and complexity

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Middle</td>
<td>Earlier</td>
<td>Middle</td>
</tr>
<tr>
<td>Later</td>
<td>Later</td>
<td>Late</td>
<td>Earlier</td>
</tr>
</tbody>
</table>

### Possible Examples

- Demonstrates interest in musical sounds
- Tries out different ways of making musical sounds with voice, body, or instruments (sometimes in response to adult prompting)
- Engages in brief segments of musical activities initiated by others, by making musical sounds using voice, body, or instruments
- Adapts to changes in the qualities of basic music elements (e.g., faster/slower, higher/lower, louder/softer) by making musical sounds using voice, body, or instruments
- Extends or varies music with new words or sounds through voice, body, or instruments, using basic music elements (e.g., faster/slower, higher/lower, louder/softer)

| Child is not yet at the earliest developmental level on this measure
| Child is emerging to the next developmental level
| Unable to rate this measure due to extended absence

- Turns toward adult who starts to sing.
- Puts hands on a drum while another child is tapping on the drum.
- Plays a favorite song on a recorder or electronic device.
- Claps cymbals together while marching outside.
- Makes vocal sounds or hums spontaneously during play time.
- Shakes a tambourine as an adult shakes a tambourine.
- Hums softly to self a clean-up song with a recognizable melody and sings some words when the song is initiated by an adult.
- Responds rhythmically, “I see a red bird looking at me,” when an adult chants, “Brown bear, brown bear, what do you see?” and then continues to respond to the adult with other chants.
- Sings the words to “De Colores” for part of the song. [Note: “De Colores,” a song in Spanish.]
- Plays rhythm sticks along with a beat while feeling vibrations from a big drum on the floor.
- Taps a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Sings a song in different voices (high, low, soft, loud), following an adult’s lead.
- Moves arms to the song “Row, Row, Row Your Boat,” faster and then slower, depending on how rapidly or slowly others are singing the song.
- Sings a familiar song on own, first softly, then loudly.
- Strums a guitar or ukulele, or taps a xylophone, along with a song, changing the tempo of the strumming or tapping from faster to slower or slower to faster.
- Mimics the sounds of a musical instrument to extend the chorus of a familiar song.

- Claps cymbals together while marching outside.
- Makes vocal sounds or hums spontaneously during play time.
- Hums softly to self a clean-up song with a recognizable melody and sings some words when the song is initiated by an adult.
- Responds rhythmically, “I see a red bird looking at me,” when an adult chants, “Brown bear, brown bear, what do you see?” and then continues to respond to the adult with other chants.
- Sings the words to “De Colores” for part of the song. [Note: “De Colores,” a song in Spanish.]
- Plays rhythm sticks along with a beat while feeling vibrations from a big drum on the floor.
- Taps a triangle to follow a rhythm of a song, such as short-short-long, short-short-long.
- Sings a song in different voices (high, low, soft, loud), following an adult’s lead.
- Moves arms to the song “Row, Row, Row Your Boat,” faster and then slower, depending on how rapidly or slowly others are singing the song.
- Sings a familiar song on own, first softly, then loudly.
- Strums a guitar or ukulele, or taps a xylophone, along with a song, changing the tempo of the strumming or tapping from faster to slower or slower to faster.
- Mimics the sounds of a musical instrument to extend the chorus of a familiar song.
**Developmental Domain: VPA — Visual and Performing Arts**

## VPA 3: Drama

Child increases engagement, skill development, and creative expression in drama

### Mark the latest developmental level the child has mastered:

<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- There are no earlier levels for this measure

- Demonstrates interest in adult’s dramatic portrayal of a character
- Uses facial expressions, voice, or gestures in response to an adult’s dramatic portrayal of a character
- Portrays a familiar character in a simple way, using facial expressions, voice, gestures, or body movements
- Portrays a character with some detail when contributing to an improvised drama based on a story, song, or poem, or contributes to dialogue or ideas about a plot in response to adult’s suggestions
- Creates and maintains details of a character when contributing to an improvised drama (e.g., dialogue, plot, setting) without adult prompting

- Extends a plot by creating a new ending during a dramatization of a story about a trip under the sea: “I like the octopus. I’m going to stay in the sea and be her friend because she’s lonely.”
- Picks up a basket, rubs stomach, and communicates that everyone will be hungry, so they should stop and get some food, while improvising a drama about a bus trip.
- Communicates that child will act sad when playing the role of an animal whose home in a tree has been cut down, during a dramatization of a story about a rainforest.

- Communicates details about a character’s emotions or thoughts when contributing to an improvised drama

### Possible Examples

- **Responding**
  - Laughs when adult acts out a silly character.
  - Watches closely as adult uses puppets to present a story.
  - Moves toward adult who is getting out props to act out a character.
  - Creates and maintains details of a character when contributing to an improvised drama (e.g., dialogue, plot, setting) without adult prompting

- **Exploring**
  - Jumps up and down or moves hands, in response to an adult acting as the doctor while reciting “Five Little Monkeys Jumping on the Bed.”
  - Flaps arms like wings and pretends to fly, imitating an adult who is acting like a mother bird.
  - Cradles a baby doll in arms while gazing and cooing at the doll, as an adult acts out a story about a mother and her baby.
  - Roars like a lion in response to an adult pretending to be a lion.

- **Building**
  - Pretends to be a bunny sneaking a carrot out of a garden, after hearing a story about Peter Rabbit.
  - Acts out the role of a firefighter by wearing a hat and pretending to hold a hose to put out a fire.
  - Pretends to be a monster and does a monster dance after hearing the story Where the Wild Things Are.
  - Takes a pretend cookie and points to a pretend glass of milk, acting like a mouse, while an adult reads If You Give a Mouse a Cookie.

- **Integrating**
  - Plays the role of Goldilocks pretending to try out three different beds and communicating that the third bed is “just right.”
  - Shivers and squints eyes to portray a character after hearing a story about being in cold wintry weather.
  - Communicates, “We can push him in the water. Help me!” as a character in a teacher-led story dramatization about a whale that is stranded on a beach.
  - Wears an apron and name tag, writes on a pad of paper, and hands out pretend plates and food, while acting out a story about a restaurant created by children.
  - Puffs up cheeks and swirls arms around to portray the wind while dramatizing, with peers, a story about a windy day, repeating the actions each time the wind blows in the story.
  - Wears a cape and pretends to fly, as a peer repeatedly communicates, “Help!”

- **Integrating**
  - Communicates details about a character’s emotions or thoughts when contributing to an improvised drama

- **Integrating**
  - Extends a plot by creating a new ending during a dramatization of a story about a trip under the sea: “I like the octopus. I’m going to stay in the sea and be her friend because she’s lonely.”
  - Picks up a basket, rubs stomach, and communicates that everyone will be hungry, so they should stop and get some food, while improvising a drama about a bus trip.
  - Communicates that child will act sad when playing the role of an animal whose home in a tree has been cut down, during a dramatization of a story about a rainforest.

- **Integrating**
  - Creates and maintains details of a character when contributing to an improvised drama (e.g., dialogue, plot, setting) without adult prompting

- **Integrating**
  - Extends a plot by creating a new ending during a dramatization of a story about a trip under the sea: “I like the octopus. I’m going to stay in the sea and be her friend because she’s lonely.”
  - Picks up a basket, rubs stomach, and communicates that everyone will be hungry, so they should stop and get some food, while improvising a drama about a bus trip.
  - Communicates that child will act sad when playing the role of an animal whose home in a tree has been cut down, during a dramatization of a story about a rainforest.

- **Integrating**
  - Extends a plot by creating a new ending during a dramatization of a story about a trip under the sea: “I like the octopus. I’m going to stay in the sea and be her friend because she’s lonely.”
  - Picks up a basket, rubs stomach, and communicates that everyone will be hungry, so they should stop and get some food, while improvising a drama about a bus trip.
  - Communicates that child will act sad when playing the role of an animal whose home in a tree has been cut down, during a dramatization of a story about a rainforest.

**Possible Examples**

- **Responding**
  - There are no earlier levels for this measure
  - Demonstrates interest in others’ dance-like movements
  - Moves body in response to music, rhythms, or others’ movements
  - Moves body or body parts through space in response to music, rhythms, others’ movements, or adults’ cues
  - Tries out a variety of movements through space, with some body control and awareness, in response to music, rhythms, others’ movements, or adults’ cues
  - Produces dance-like movements with increasing body control and awareness, in response to music tempo, rhythms, others’ movements, or adults’ cues
  - Improvises dances by changing tempos (e.g., fast/slow) and by varying qualities of movements (e.g., big/small, high/low, smooth/jerky) in response to music

- **Exploring**
  - Watches intently as other children move or dance to music.
  - Moves toward other children who are doing dance-like movements with streamers.
  - Asks to watch a dance on a computer or an electronic tablet.
  - Moves to music, matching an adult’s side-to-side movements or other simple movements.
  - Claps hands or pats legs to the rhythm of a song.
  - Sways head back and forth to the beat of music.
  - Marches around the room in response to drumming by a peer.
  - Sways arms while holding a scarf and dancing to music.
  - Rolls body on the floor in response to an adult’s cue.
  - Moves arms up and down in response to vibrations from music.
  - Bends down low and then jumps up high in an attempt to follow an adult’s movements.
  - Stops and starts dancing during a freeze-dance game.
  - Moves slowly, then quickly, in response to changes in music.
  - Makes up own dance while listening to music, by tiptoeing, lowering self to floor and rolling on floor, jumping up, and then spinning.

- **Building**
  - Sways, twirls, or leans back and forth to follow movements of peers while listening to music.
  - Steps sideways, forward, and backward, without bumping into peers during a line dance led by an adult.
  - Moves body slowly, with pauses, in a variety of positions while dancing to music with scarves.
  - Swings arms smoothly and then moves arms with sharp, jerky movements, in response to drumbeats, while making up a dance.

- **Integrating**
  - Improvises dances by changing tempos (e.g., fast/slow) and by varying qualities of movements (e.g., big/small, high/low, smooth/jerky) in response to music

---

### Possible Examples

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
Glossary of Terms and Phrases Used in the DRDP (2015)

**Assemblage:** An artistic composition made from scraps, junk, or odds and ends.
Appears in VPA 1: Visual Art

**Investigates/Investigation:** In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.
Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Locomotor Skills:** The ability to project the body into or through space.
Appears in:
PD-HLTH 2: Gross Locomotor Movement Skills
PD-HLTH 3: Gross Motor Manipulative Skills

**Manipulative Skills:** Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).
Appears in PD-HLTH 3: Gross Motor Manipulative Skills

**Observes / Observation:** Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.
Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Onset:** The first consonant or consonant cluster in a syllable (e.g., the *h* in the one-syllable word *hat*; the *m* and *k* in the two syllables in the word *monkey*).
Appears in LLD 8: Phonological Awareness

**Rime:** A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.
Appears in LLD 8: Phonological Awareness

The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California’s diverse population of young children, with specific consideration for children who are young dual language learners. The introduction in the DRDP (2015) Assessment Manual provides information on completing the assessment with young children who are dual language learners. Keep in mind that young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains of the DRDP (2015).

The following resources will increase your knowledge and help you better complete the DRDP (2015) for young children who are dual language learners.

### From the California Department of Education

| California's Best Practices for Young Dual Language Learners: Research Overview Papers | Two papers in this series are particularly relevant: “Assessment of Young Dual Language Learners in Preschool” focuses on the need for accurate and valid assessment of young dual language learners. It includes a decision tree for practitioners to determine in which language to assess young DLLs, a matrix of language and literacy assessment for use with preschool-age children, and a sample family interview protocol to learn about families’ language practices. “Early Intervention and Young Dual Language Learners with Special Needs” addresses the language development of young dual language learners with special needs and key considerations when choosing the language for intervention. | http://www.cde.ca.gov/sp/cd/ce/documents/dllresearchpapers.pdf |
| California Department of Education web pages: | - Understanding Dual Language Development  
- Assessing Young Dual Language Learners  
- English Language Development (ELD) Foundations  
- Supporting Dual Language Learners | https://desiredresults.us/dll/index.html |
<p>| Assessing Children with Disabilities who are Dual Language Learners | This document provides guidance in assessing children with disabilities from linguistically diverse backgrounds with the DRDP (2015) including information on second language acquisition in young children, suggestions for communicating with children who are English Learners, and information about cultural influences on learning. | <a href="http://draccess.org/DLLGuidance.html">http://draccess.org/DLLGuidance.html</a> |</p>

Appendix C: Strategies for Observation and Documentation

The DRDP (2015) is administered through observation in natural settings by teachers and other service providers in the classroom or center and by family members in home and community settings. Observations are embedded into typical, ongoing routines and activities throughout the day. The process of observation requires planning in advance on the part of teachers and service providers. As you review the measures of the DRDP (2015), consider specific routines or activities during the day where you would be able to observe more than one measure or more than one child.

Strategies for Effective Observation

Observation should be ongoing throughout the year. The assessment windows for the DRDP (2015) provide a period of time to make sure teachers and service providers have sufficient documentation for each of the measures in time to submit DRDP data. To rate a child's behavior, teachers and service providers should use naturalistic, or authentic, observation strategies. Below are several key points to support naturalistic observations. You will find additional information about naturalistic assessment by viewing the short video, What is Authentic Assessment at http://draccess.org/guidancefordrdp. Many observation and documentation job aids can be found at https://desiredresults.us/content/observation-resources that can be used by EESD and other administrators to train staff.

Strategies for Effective Documentation

A variety of methods are available for recording information gathered through naturalistic observations, including:

- **Anecdotal Records** – An anecdotal record is a written note about what a child does or says during a typical or routine activity. Anecdotal records result in brief descriptions of the behavior observed.

- **Event recording (tallies)** – In event recording, the observer records each instance of the behavior being observed so that an indication of frequency is obtained. Usually this is done with tally marks but may also be recorded using a code such as “+” for correct and “-“ for incorrect.

- **Checklists** – Checklists are lists of specific skills or behaviors that can be used during observation to check off the behaviors observed with a group of children.

- **Rating Scales or Rubrics** – Rating scales and rubrics are similar to checklists in that they include lists of behaviors but they also include additional descriptive information about the behavior such as how well, how frequently or how independently the behavior occurred.

- **Work Samples** – Documentation can also include the collection of 2- or 3- dimensional products that children have produced such as drawings, writing on paper or 3-dimensional constructions the child has made for example with play dough or other materials.

- **Videos or Photographs** – Cameras can be used to document observed behaviors of children through videos or still photographs.

Information on strategies for implementing the above documentation strategies can be found at: http://eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/practice/iss-library.html

10 Strategies for Naturalistic Observation

- **Know the instrument** – Be familiar with the instrument, including the domains and measures being observed.

- **Observe naturally** – Observe the child in the context of typical routines and activities, interacting with familiar people, in familiar places, and with familiar materials.

- **Observe objectively** – Focus on what the child does. Be as objective and detailed as possible. Avoid using labels, qualitative descriptors, or stereotypic expectations that may bias your observations.

- **Observe strategically** – Observe for skills that correspond to the DRDP measures and record your observations. You may be able to gather information on more than one measure during one observation.

- **Observe daily or routinely** – When observations are part of the daily routines, children become accustomed to being observed and seeing notes being recorded.

- **Observe variety and consistency** – Be aware of a child’s overall performance, even when focusing on a single aspect of behavior. Observe the child over time and during different routines and activities.

- **Be specific and complete** – Intentionally and purposefully record the specific details of what you actually observe as soon as possible. Details are important and might be easily forgotten.

- **Plan ahead** – Plan for observations as part of weekly lesson planning. Plan to observe during activities that do not require your full assistance or plan for someone else to observe and document.

- **Allow time** – Allow adequate time for the child to complete any task that he or she is engaged in even if it requires more time than one might expect.

- **Use appropriate adaptations** – Ensure that appropriate adaptations as determined by the IFSP or IEP team are in place when observing the child.
Consider the following for planning and collecting documentation:

- Choose methods of documentation that can be embedded into a program's environment, structure, and routines.
- Plan ahead for materials needed for documentation such as sticky notes or pre-printed labels with children's names for anecdotal records or clipboards with checklists or rubrics. Materials should be strategically located throughout the classroom.
- Observe children's behaviors throughout the day and record documentation while observing.
- Date each piece of evidence for future reference.
- Collect documentation over time. Documentation over time strengthens the validity of ratings.
- Organize the documentation collected immediately after collecting it.
- Keep assessment information confidential. Store the DRDP materials, including notes, in a secure location to ensure confidentiality for each child.

Organizing Documentation

Portfolios: Portfolios are a helpful way of organizing information. EESD programs are required to use a form of portfolio to organize documentation. Portfolios may contain anecdotal notes, children's work samples, photos of children's activities, audio or video recordings, and transcripts of the child's language. The portfolio methods selected should work well for the program.

Electronic Portfolios: If notes are entered into a computer, an electronic portfolio can be produced to summarize the evidence. Please check with a local administrator for procedures regarding consent for photography and video.

Collaboration to Support Effective Documentation

A central goal for teachers and service providers who use the DRDP (2015) is to obtain measures of the child's developmental progress based on typical day-to-day behaviors. It is difficult to imagine one individual having access to all of the many learning opportunities that a child encounters throughout each day. Therefore, it is very helpful to seek input from individuals who have ongoing contact and who know the child well in order to obtain the most complete and accurate picture of the child's skills and abilities. It is important to consider how and when collaborating with others will support and help to inform the accurate rating of measures for the DRDP (2015).

Although direct observation of a child is the primary method used to inform ratings, other sources of evidence should be used to supplement observations. Gathering information from others who know the child well such as family members, caregivers, or other service providers often provides a wealth of additional information about a child's skills, knowledge, and behaviors. This also provides the additional benefit of observations across different settings. There are numerous ways that others can collaborate in sharing information such as written observations, conversations that focus on a child's development, or viewing short videos or recordings that illustrate a child's behavior in typical routines and activities.

Planning ahead can make the process of collaboration more helpful. Identify early on in your relationship with the child's family, who else might provide helpful information to assist in documenting their child's development. Make sure that the family is well informed about the purpose of the DRDP (2015) and the important role that they can play in sharing their observations about their child. With the family's permission, communicate with other individuals who know the child and strategize with them how they might be able to share information with you.

Communication is key to successful collaboration. For a more detailed look at collaboration and the assessment process please refer to Appendix F.
Adaptations are changes in the environment or differences in observed behavior that allow children with Individualized Family Service Plans (IFSPs) or Individualized Education Plans (IEPs) to demonstrate their knowledge and skills in their typical environments. Adaptations that are in place for the child during the normal course of the day should also be in place during observations for the DRDP (2015). New adaptations should not be introduced solely for the purpose of conducting an assessment. Seven broad categories of adaptations are used with the DRDP (2015). This is the same system of adaptations developed for and used in the DRDP access.

1. **Augmentative or Alternative Communication Systems**
   Augmentative and alternative communication systems are methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others. An augmentative communication system is used to augment or facilitate the development of speech. An alternative communication system is used in place of speech. Some examples include sign language, picture cards, and electronic communication devices. Assessors should use these systems as part of the observation of a child using language in a natural context. Assessors should not just elicit responses or contrive adult-directed situations.

   If American Sign Language is the child's primary language, it is designated as the home language, and not an adaptation. If sign language is used as a bridge to learning verbal language, then it is considered an adaptation.

2. **Alternative Modes for Written Language**
   Alternative Modes for Written language are methods of producing written language used by a child who cannot see well enough or cannot hold and manipulate a writing utensil well enough to produce written symbols. If a child cannot see or cannot hold a pencil or marker, this adaptation may be used to assist in reading or writing, or emergent reading or writing. Examples of this adaptation include using a Braillewriter, keyboard, or computer.

   Naturally, preschool-age children are not proficient at reading and writing. This adaptation allows for children to explore reading and writing and develop their skills in a developmentally appropriate manner.

3. **Visual Support**
   Visual supports are adjustments to the environment that facilitate a child’s ability to see or to understand the surrounding environment or events. Acceptable visual supports include:
   - Adjustments in contrast
   - Adjustments in lighting
   - Distance from objects
   - Increased size of materials
   - Verbal description of events

4. **Assistive Equipment or Devices**
   Assistive equipment or devices are tools that make it possible or easier for a child to perform a task. The child should be familiar with the use of the device. Any type of adaptive equipment or assistive device that the child needs for mobility, positioning or manipulating objects is acceptable, including:
   - Walkers
   - Standers

5. **Functional Positioning**
   Functional positioning enables postural support that allows a child to have increased control of his body. It is important that positioning devices are available to the child across settings so that the child may access daily routines and activities and so they may be observed in a variety of activities. Some examples include:
   - Standers
   - Cube chairs
   - Tricycles with seat belts and built-up pedals

6. **Sensory Support**
   Sensory support includes either increasing or decreasing sensory input to facilitate a child’s attention and interactions in the environment. Some children may need increased sensory input and others may need decreased input. Some children require different types of sensory support in different activities. Sensory support may include:
   - Reducing background noise
   - Adjusting tactile stimulation
   - Adjusting visual stimulation

7. **Alternative Response Mode**
   Using alternative response modes means recognizing that a child might demonstrate mastery of a skill in a way that differs from a typically developing child. For this adaptation, the environment is not modified as in the other adaptations. Rather, the child’s unique yet consistent responses that may indicate the presence of a skill are identified. For example, the child with autism may look out of the corner of his or her eye instead of establishing direct eye contact, or the child with a physical impairment may use atypical movement patterns. The form of a child’s response may differ from that of his peers and still be considered to demonstrate mastery of a skill.
Appendix E:
Resources for Working in Partnership with Families

A central goal of the DRDP is to identify a child’s developmental progress based on typical, day-to-day behaviors. It is appropriate to seek input from individuals who have ongoing contact with the child and know the child well. Family members’ descriptions of their child’s behavior in the home or in community settings will help teachers and service providers know more about the child’s behaviors across settings, particularly for those skills the child may not demonstrate routinely in the educational setting; and help teachers and service providers obtain more comprehensive information in order to make accurate ratings for the DRDP (2015).

Family members may participate in the DRDP assessment in a number of ways:

- Inform the child’s teachers and service providers of the child’s history for a more complete picture of the child.
- Share the skills they see their child using in typical activities, and might share these skills via stories, photos, drawings, observations, and/or video clips.
- Share the child’s strengths, areas they wish to focus on, and areas of growth they observe.
- Become informed about the next steps in their child’s development.
- Help determine which adaptations will help their child participate in everyday activities (for children with an Individualized Family Service Plans IFSPs) or Individualized Education Program (IEPs) and share with the team adaptations the child uses at home, at school, and in other settings.

Below are resources to assist families in knowing more about the DRDP (2015) and the skills assessed as well as resources to assist teachers and service providers in working as partners with families in the assessment process.

Resources for Families

A document describing how the DRDP (2015) works for children, including those with IFSPs and IEPs; and how it benefits families, children, providers, and programs.

All About Young Children: https://allaboutyoungchildren.org/
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skillful at moving their bodies. (Available in eight different languages.)

California MAP to inclusion and Belonging: http://cainclusion.org/camap/counties.html
The MAP Project website supports the inclusion of children with disabilities and other special needs ages birth to 21 in child care, after school and community settings. It includes links to resources on topics related to families and children with IFSPs and IEPs. The website contains a statewide interactive directory by county, of Family Resource Centers (FRC), Special Education Local Plan Areas (SELPA), Regional Centers, Head Start, and more for families of children with IFSPs and IEPs.

Appendix F:
Collaboration to Complete the DRDP (2015)

“The most valuable resource that teachers have is each other. Without collaboration our growth is limited to our own perspectives.” – Robert John Meehan

Collaborating with Others Who Know the Child Well

Our understanding of young children is strengthened when we commit to partnerships with individuals, including family members, who know the child well and in different settings. Collaboration in gathering and sharing information is important because it affords us windows into a child’s life and offers perspectives that enhance our understanding of a child’s skills and behaviors. Identifying and communicating with the individuals who can collaborate on rating the measures of the DRDP (2015) is an essential step in this process.

Through collaboration, early educators and special educators each bring their skills and perspectives. Early educators contribute by providing a picture of the child in the context of a classroom setting. Special education providers contribute by identifying perspectives on a child’s unique learning needs and specific understanding of a child’s disability including materials that should be available and adaptations that should be in place. This lays the foundation for teachers and service providers to complement one another’s work in assessing a child’s skills and development. Shared information can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services.

Collaboration to share assessment observations and evidence for completing the DRDP (2015) is built on relationships and a commitment to ongoing communication. It is developed over time with an understanding of each person’s role. Aim for multiple, informal strategies that can be used on a daily basis. Identifying mutual interests in supporting the child is important. Some questions that address joint interests include:

- What are the child’s goals?
- What specialized equipment or adaptations are used?
- How will the goals be infused into the child’s day and into learning activities?
- How will we know our strategies are working?

Collaborating with others in the assessment process is especially important in situations where the child is served by multiple providers. For example, a child may attend an early education program and also receive special education services, such as speech-language, occupational, and/or physical therapy. Early education teachers and special education providers can work hand-in-hand to complete the observations and DRDP (2015) ratings for children who are dually enrolled in both programs. How this collaboration will take place – who will be involved and what roles each individual will play – will vary depending on the situation. Teachers and service providers have reported the following helpful strategies:

- sharing information, including observations, adaptations, curriculum and program goals, and IFSP outcomes or IEP goals
- providing anecdotal notes
- sharing work samples and portfolios
- reviewing reports of DRDP (2015) results together

Increasingly, teachers and providers are utilizing technology such as short video clips or recordings, with family permission, to share information and observations. The DRDP (2015) app helps teachers collaborate, as well as using technology such as email, phone conferences and free web conferencing platforms. Local policies on using devices should be followed.

The early education teacher and special education service provider responsible for completing the DRDP (2015) should each take the lead in partnering with others who work with the child. The general educator is responsible for entering DRDP data into DRDPtech. The special educator is responsible for reporting and entering the assessment data on children who have IEPs or IFSPs to the SELPA. However, except for data reporting, the assessment can be completed together by both educators, and a copy of the Rating Record held by each of them for their respective reporting. Suggestions to help get started working together include:

- Make an initial plan detailing areas to be observed directly and those areas in which others may have a more thorough knowledge of the child. The general education teacher can provide information on all domains. A speech-language therapist might inform measures in the Language and Literacy Domain. Families and special education providers including physical and occupational therapists are a good source of information for measures in the Physical Development and Health Domain.
- Contact the individuals who will collaborate to discuss the mutual goal of completing the assessment and to develop a plan for working together.
- Develop a timeline that is acceptable to all partners, including identifying deadlines and strategies to meet timelines.
- Collect any signature requirements for sharing child information from the family.
- Gather multiple perspectives and consider input from family and others who know the child during assessment.
- Determine when and how communicating about updates and results will occur.
Collaborating with Families
Gathering family perspectives about their child’s development and behavior provides important and valid data, which is useful for making informed assessment decisions. Research suggests that family observations are reliable and valid and should be considered an essential component of a comprehensive assessment process. Inviting parents and other family members to share observations of their child’s development and behavior is required for EESD programs and is good practice in all early childhood settings and programs.

When families collaborate with teachers and service providers in sharing their observations about their child’s behaviors in the home or in community settings, it provides a richer and broader view of a child. Information from families helps to identify skills and behaviors that the child may not demonstrate routinely in the educational setting. For example, a teacher or therapist may not regularly observe a child’s dressing or other self-help skills. However, families have repeated opportunities to observe their child’s self-help skills both over time and in different settings. Parent observations support more accurate reporting about a child’s skills.

Strategies for gathering information from families include the following:

- Make sure that families understand the skills and behaviors described in the DRDP (2015) measures. Teachers and service providers understand expected sequences of child development and are trained about how items on the DRDP (2015) reflect these sequences. Parents might not understand fully the meaning of measures without explanations or examples. It may be useful to provide families with examples of the kinds of behaviors to look for or the routines and activities that might provide a context for a behavior. For example, rather than ask a parent to describe a child’s grasping pattern, inquire about how a child picks up small pieces of cereal during mealtime.

- It is reasonable for the observations of parents and practitioners to differ across the range of behaviors being rated. A child’s behavior during activities and routines that occur in the classroom setting may differ from the same child’s behavior in activities and routines in home or community settings. Not all perspectives about children’s behavior based on parent or practitioner observations will be congruent. Rather, aim for convergence or the pooling of perspectives from all who know the child and have had repeated opportunities to observe behavior in different settings.

The ongoing conversations that we have with family members during our typical interactions with them are rich opportunities for learning about their child. Leading a focused conversation with a family is particularly important to obtain information on measures that you have not had the opportunity to observe. During these conversations, focusing on routines and activities provides a very useful context for asking a family about their child’s everyday learning opportunities and skills. The four steps in the resource listed below will guide you in planning and leading focused conversations with families to help complete the DRDP (2015). If this is the first DRDP (2015) assessment that you will be completing with a particular child, be sure that you have spent enough time getting to know the child by observing the child’s skills during typical routines/activities and by having conversations with the family.

For more information
DEC Recommended Practices in Collaboration
Developed to provide guidance to practitioners and families about the most effective ways to improve the learning outcomes and promote the development of young children, birth through age 5, who have or are at-risk for developmental delays or disabilities. The purpose is to help bridge the gap between research and practice by highlighting those practices that have been shown to result in better outcomes for you.
