The Development of Speech Sounds In Children

This chart shows at what age 90% of children can articulate the English sounds correctly. Vowels should be correctly produced by the age of three. All children do not develop at the same time and in the same way, so we cannot expect correct speech from every child in the primary grades.

The following sources were consulted for development of these norms: Poole, Sander, Hejna, Fudula and Templin.
El Desarrollo de Sonidos del Habla de Niños

El 90% de niños dominan estos sonidos en Español ha estas edades.

Based on: Jimenez 1987, Acevedo 1993
